NORTHERN PACIFIC RAILWAY CO.

N. P. 1799 10-32

INFLAMMABLE

Tanks must be loaded with outlet valve caps off and valve must not permit more than a dropping of liquid. Inflammable liquids must not be loaded into domes of tank cars. Manhole covers and outlet valve caps must be securely closed and be tight against escape of vapor or liquid. Suitable gaskets must be used to insure this. A tank car that leaks or that has not been properly tested and marked, must not be used for the transportation of dangerous articles.

NAME OF COMMODITY MAY BE INSERTED HERE

KEEP LIGHTS AND FIRES AWAY
HANDLE CAREFULLY

This car must not be next to a car containing Explosives. Do not enter with exposed flame, nor with lighted lantern, until car has been ventilated and vapors allowed to escape. When lading requiring this placard is unloaded from cars, THE PLACARDS MUST BE REMOVED OR REVERSED
