Joint facility contract reference: *Not Joint Account* Made in APR 1922

The location is *all rights reserved* on this company's property. To secure rights, it will be necessary to do nothing—  
Location: Burns, Mont.

Title Estimated cost proposed trackage & platform for handling ice, and as per sketch dated November 21st, 1921.  
Reason:

At Burns at the point indicated on the attached print, there is a reservoir with an area of 20.6 acres formed by the water of Burns Creek. As there is no current this freezes over before the Yellowstone River and it is estimated that at least two cuttings of ice can be obtained every year. Permission has been obtained from the U.S.A. Reclamation Service to harvest this ice and it is recommended that it be used in place of that hauled every year for use in this territory and west from Detroit and points east, thereby saving a minimum haul of 433 miles. Informal authority has been granted for a track to serve the loading platform as shown and work of construction is now in progress.

Checked and Entered  
President's Office

Work to be done by company force ~~contract~~ under charge of Division Superintendent.

Accounting to concentrate in the office of Superintendent Glendive

Signature and Title: *[Signature]* Supt. Date Nov. 26th, 1921.
