Title **100 Gal. Gasoline Storage Tank**  
and

Reason: The former light 60 gallon capacity galvanized tank used by section foreman for storing gasoline for use on section motor car was in such condition as to not permit of further use and was scrapped. Since then section foreman has been maintaining his supply of gasoline in small cans resulting in considerable loss from evaporation and in addition to the fire risk from storing these small cans in tool house, there is possibility of loss from pilferage.

Recommend providing one of our standard 100 gallon tanks buried in accordance with standard plan.
