RULES FOR USE OF TRACK BETWEEN NETTLETON AVE. AND CENTRAL AVE.

Double track extends from east leg of Wye, Central Ave., to 3rd Street, just east of passenger station at Nettleton Ave.

At the easterly end of the double track, east of Nettleton Ave. passenger station, the normal position of the switches will be set, and kept locked, for the west bound main track for trains approaching from the First District.

All trains will come to stop 200 feet from crossing with Wisconsin Central Railway between Central Ave. and Hill Ave., and not proceed until line is known to be clear.

The connection at the west end of the double track near the east leg of the Wye at Central Ave. will be kept set and locked for east bound trains, coming from Central Ave. depot.

Between Nettleton Ave. passenger station and the Great Northern connection, north of Cadotte Ave. yard, the two tracks will be operated as double track, each train keeping to the right, and will be considered as yard tracks in yard limits, but when in use the trains must protect their rear ends, if stopped, to avoid the possibility of accident.

Great eare must be taken by train and engine men in use of east leg of Wye at Central Ave., it being single track and on sharp Trains and engines will not exceed four (4) miles an hour and in foggy or stormy weather they must protect themselves over

Junction switch at connection of First District and Second District main lines near Central Ave. depot will be kept set and

Interlocking switches and signals located at Great Northern Crossing, Central Ave., and C. St. P. M. & O. crossing just west of Nettleton Ave. passenger station.

Specials, extras, work extras and switch engines do not require telegraphic orders for movements between Nettleton Ave. passenger station and Central Ave., but must observe all rules relative to protection of rear end and use of double track. Work extras must protect at all times.

All east bound trains must get clearance at Central Ave. Transfer crews coming from Cadotte Ave. yard will not occupy main line until they know that superior class trains have passed. First class west bound trains will leave register ticket with operator Nettleton Ave. passenger station.

To insure personal safety, operators having train orders or messages to deliver to passing trains should stand to the right hand side of train and avoid standing between tracks when possible to do so.

All trains must approach and pass through yards under full control.

DOUBLE TRACK RULES.

1. Double track extends from Passenger Depot Duluth to Bridge Switch, from Elevator Station to Omaha Connection, Superior Union Depot to Central Ave., Superior Freight Station to Belknap St., and from Garfield Avenue to West Duluth Junction.

2. All trains and engines using double track will keep to the right. These tracks will be used in no other way except by special orders given by the Superintendent at Duluth.

3. Inferior Class trains will keep out of the way of Superior Class trains going in the same direction.

4. Junction Switch at Garfield Avenue will be kept set for straight line.

The switch at end of double track West Duluth Junction will be kept set for in-bound track from Third District.

6. All trains must be under full control approaching Omaha connection at Superior.
7. Grassy Point Line Switch at West Duluth Junction will be kept set for main line east bound track. 8. Specials, extras, work extras and switch engines do not require telegraphic orders for movements between Central Ave. and Duluth running via St. Louis Bridge or between West Duluth Junction and Duluth,

but must observe all rules relative to protection of rear end and use of double track. Work extras must pro-

tect at all times in both directions.

9. West-bound trains, engines and switch crews will have the right to use east-bound track at Central Ave, between west lead from yard and junction switch leading to first district main line without protection, and all east-bound trains will approach and pass through such territory with train under perfect control, expecting to find track occupied.

10. Junction switch at end of double track west of depot at Central Ave. will be kept set and locked for

west-bound track.

11. Rule 288, Book of Rules, is modified to the extent that between Superior and Duluth and between West Duluth Junction and Duluth, Second Class and extra trains may run ahead of First and Second Class trains without orders. Between Central Avenue and Superior extras may run ahead of Second Class trains without orders.

To insure personal safety operators having train orders or messages to deliver to passing trains should stand to the right hand side of train and avoid standing between tracks when possible to do so.

SPECIAL RULES. (Note Changes.)

First Class trains and specials will register at Duluth Union Depot, Superior Union Depot, Central Avenue. West Duluth and Fond du Lac.

Second Class trains, extras and light engines will register at Rice's Point, Superior Freight Station,

Central Avenue, West Duluth and Fond du Lac.

Clearances will not be required at Rice's Point, Superior Freight Station and Superior Union Depot.

BULLETIN STATIONS:—Duluth Union Depot, Rice's Point Yard Office, Superior Union Depot, Central Avenue. All train and engine men must inspect bulletins before departing on their run.

STANDARD CLOCKS:—Rice's Point Yard Office and Dispatcher's Office, Duluth.

East leg of wye at West Duluth Junction is "Grassy Point Main Line," and the switch at junction of east

and west legs of wye will be kept set for Grassy Point Line.

All trains must run slow around east leg of wye at West Duluth Junction and passing Zenith Furnace Plant, looking out for switch engines working on main line. This will in no wise excuse switch engines from full compliance with Paragraph "F," Rule 298, Book of Rules.

Third District main line trains will register and receive clearance and orders at West Duluth.

East Bound second class and inferior trains coming from Third District, may register at West Duluth by ticket.

No. 104 will register West Duluth by ticket.

All trains must come to a full stop two hundred (200) feet from draw spans on St. Louis River and Grassy Point Bridges and must not proceed until safety signals are given. Trains must not exceed eight (8) miles per hour on any part of these bridges or trestles.

All east bound trains and engines, and all west bound trains and engines via St. Louis River Bridge must come to a full stop two hundred (200) feet from Junction Switch at Garfield Avenue and must not proceed

until the way is known to be clear.

Care and watchfulness must be exercised by all, on both single and double track. A brakeman or flagman must be stationed on the rear car of all trains, and be provided with proper danger signals, and in case of stoppage on the main track must immediately go back and protect the train. Conductors and Switch Foremen will be held responsible for the strict observance of this rule.

All trains must approach and pass through yards under full control. The L. S. T. & T. Co., Superior, require trains to not exceed 10 miles per hour over switches at or near Belknap Street.

All trains and engines without trains will run under full control between Belknap Street connection and west yard limit board. Superior, expecting to find main track occupied by switch crews.

All trains and engines in foggy or stormy weather must approach Union Depot grounds at Superior

with utmost caution.

Duluth Yard extends from Duluth Passenger Station to east end of St. Louis Bridge and from Garfield Avenue to West Duluth Junction and Third District yard limit board and Grassy Point Bridge. Switch engines will work within these limits, avoiding regular trains. All trains must run under full control in these limits, expecting to find track obstructed by transfers and by trains using cross-over tracks.

All extras and delayed regular trains must approach the terminal grounds at Superior with extreme caution, having train under full control.

Engines heavier than N. P. Class P-3 & R (total weight of which, including tender, i 265,000 pounds) are not permitted to pull or be handled in trains over Grassy Point Bridge. P-3 engines, and other engines of similar weight, must not exceed eight (8) miles per hour on this bridge. Double headers, any class engines and fifty (50) ton capacity ore cars loaded with ore, not permitted on this bridge. Dead engines, wrecking cranes and steam shovels must be separated from engine hauling and each other by at least three (3) cars.

Track between Fond du Lac and Power Plant must not be used except by authority of train orders.

N. P. and Zenith Furnace switch engines will use west leg of Wye at West Duluth Junction and Fond du Lac main line between West Duluth Junction and yard limit board for switching purposes, but will not leave cars on such tracks. All trains will look out for these crews in above limits.

Derailing switches located as follows and must be kept in derailing position when not in use: West End Zenith Furnace track. East End N P. freight house track, Superior. Main line just east of N. P. freight house. Superior.

Interlocking switches and signals are located at D. M. & N. Junction, and crossing of W. C. Ry. just west

of D: M. & N. ore docks.

RULES GOVERNING MOVEMENT OF TRAINS ON SINGLE TRACK OVER ST. LOUIS BRIDGE.

LOCATION OF SIGNALS.

Home Semaphore 295 feet west of double track switch Elevator Station only indicates position of switch at end of double track. East Bound trains from Superior will not pass Elevator Station without receiving hand signal from operator at that point. It must be understood that this signal only confers train rights to use of track to Bridge Switch and has no reference to entering on or passing through draw spans. Separate instructions cover the latter movements.

The approach to the Wisconsin draw from either side will be governed by disc signals, which, when set clear or with white light displayed, will indicate that the draw is clear for the passage of trains; and when set red or red light is displayed, will indicate that

the draw is open for boats.

The approach to the Minnesota draw going towards Duluth will also be governed by a disc signal, which, when set clear or with white light displayed, will indicate that the draw is clear for the passage of trains; and when set red or red light is displayed, will indicate that the draw is open for boats.

In addition to Rule requiring trains to stop 200 feet from Minnesota and Wisconsin draws on St. Louis river bridge, trains will not proceed until they had received hand signal to go ahead to be given with a flag during day and with lantern at night, by man located on the track on each draw, and will answer such signal in the usual manner by two short blasts of whistle.

A switch tender will be stationed at Bridge Switch, north end of the bridge, to throw switches and give hand signals.

All trains from Duluth toward Superior will come to a full stop approaching Bridge Switch and wait for hand signal, both day and night, from switch tender before proceeding.

All trains toward Duluth will get signal from switch tender after switch has been properly set for their route.

Until the new electric interlocking plant and signals are installed, trains will be governed as described above, but must at all times exercise the greatest care and caution in movements across the bridge, and especially approaching from the northerly end, to see that the signal given by switch tender is intended for them.

A red disc thus by day or red light by night indicates "Stop" danger.

Edge of disc thus by day or white light by night indicates "Safety" proceed.

Where disc signals are used the indications are given by colors. Where semaphore signals are used the arm to the right of signal mast as seen by approaching trains governs, and indications are given by position or color. Horizontal or red means "Stop" danger; Diagonal downward or white "Clear" proceed.

These signals do not protect rear of trains, and full protection as per rules must be had at all times.

After a train has received a signal to move in one direction it must not move in opposite direction without receiving proper signal for such movement.
