#### SYNOPSIS OF RULES GOVERNING A B C OPERATION.

All the running rights that a train has are conferred upon it through the medium of a block card

A block is understood to mean the section of main line extending from the signal semaphore at one telegraph office to the signal semaphore at the next telegraph office in advance.

Train and eigine men are prohibited from accepting or running on a card purporting to authorize them to pass an open telegraph office.

No matter what may be the position of signal semaphore no train will, except under flag protection, be allowed to leave a terminal or pass a telegraph office without both the conductor and engineer first securing a block card authorizing the train to use the block in advance.

Station semaphore signal when on the lower angle or showing "Green" indicates "Block ahead clear."

When on upward angle or showing "Yellow" indicates "Caution, block not clear." When on the horizontal or showing "Red" indicates "Stop."

Trains approaching telegraph offices and finding signal at "Clear" will understand from this that the block ahead is clear and will pass the telegraph office, catching the block cards as they pass. If, however, from any cause the block cards should not be secured, the train will be brought to an immediate stop and will not proceed until the cards are se-

Signal at "Caution" will indicate:-

(1) Block is obstructed and approaching train will receive card to meet or pass another train at station where card is issued, and that train may proceed after complying with instructions upon card.

Block is occupied by train ahead and card issued authorizing approaching train to follow.

(3) Approaching train will receive card to meet or pass one or more trains at intermediate siding. Signal at "Danger" indicates "Stop, block not clear." Trains must not pass signal in this position.

Conductors and engineers will immediately examine the block card following its receipt by them and make sure that it is correctly made out. They will follow implicitly all instructions given thereon. If directed to take siding at a station

they will do so, disregarding signal to come down main line. If the exceptions state a train is to be met, it must state which train will "hold main line" or "take siding," otherwise must be treated as an improper card and must not be acted upon. If there are no exceptions the operator will insert the word "Blank" where exceptions should appear on the card, and if this Information is not shown on card, it must be treated as an improper card and not acted upon.

Each train will be designated by the number of its leading engine.

When necessary for the purpose of doing switching or other work, to occupy the main line at a station, the dispatcher will give the train required to do such work a block switching card on the usual form, limiting the time that the main line can be occupied. On no account must the main line be occupied beyond the limit expressed in such card.

Trains taking side track will head in at the first switch unless otherwise directed by instructions on block card. A train receiving a block card bearing exceptions of any nature, will, in all cases, fulfill the exceptions on card, irre-

spective of position of signals or hand signals received. Information as to slow orders, etc., will be bulletined and may be written in manifold on train order Form 19, and

copy be delivered to conductor and to each engineer, together with block card as above. Conductors or engineers must not report train as ready to leave any station until train is actually ready to move.

air tested, all preliminaries gone through with and conductor positive that engineer is ready to pull open the throttle and

Information should be given dispatchers as to any work to be done before reaching next block office

A train running on a block card, bearing an exception to hold main line to meet an opposing train at station in advance will, in no case, run beyond the first switch at the meeting point if there is but one passing track there; or at station where passing tracks are parallel until it is seen that the opposing train has taken siding, after which they may proceed through the block. If there is a lap siding at the station where the meeting point is made, train having card to hold the main line and meet the opposing train will not proceed beyond the first switch at the lap until they have seen that the opposing train is on the siding, after which they may proceed through the block.

#### RULES GOVERNING STAFF OPERATION IN A B C TERRITORY.

Following rules will govern the operation of trains in A B C territory, where telegraph communication cannot be had account of wire failure: A wooden staff has been provided one inch in diameter and 16 inches long, having attached to it be authority for a train to proceed from the first station West of territory in trouble to the next block office East, at which point the train will procure a staff for the block ahead, proceeding through that block, repeating the operation until they reach a block office where telegraph communication can be had with another dispatcher's office. The authority to make use of staff at the initial office will be issued by the dispatcher's office in the form of a block card, authorizing the use of staff over the trouble territory, but on no account will the staff be used out of a station where the operator has previously pledged the block for a West bound train. After having run through a block with the staff the crew using it for

that purpose will leave it with the operator at the end of the block, who will return it to the office at the West end of the block by the first train running in that direction. A West bound train may make use of this staff to run from one block office to the next whenever the staff can be obtained by them at the East ead of the block concerned. It is permissible for the dispatcher to order the staff taken by section men or messenger from the office at the West end of the block to the office at the East end of the block for the purpose of moving a West bound train whenever necessity requires that it be done. In the event of a wire failure occurring between telegraph offices, dispatchers on the opposite side of a break from the dispatcher in whose territory the break occurred will be advised of the facts by the operator closest to the break and it will be understood to be the duty of the dispatcher so notified to pick up the work of moving trains over the detached territory until repairs to the wire have been made, and the detached territory can again be handled by the dispatching office in whose jurisdiction the trouble occurred. Operators will keep staff in a given place readily accessible.

# RULES GOVERNING MOVEMENT OF TRAINS AT U. P. CROSSING, SPOKANE.

RULE 1-Engines or trains must never be moved past the signal in interlocking limits without first obtaining clear board.

A. If board on signal is in horizontal position it indicates "Stop." If in vertical position it indicates "Proceed."

B. At night a red light in signal indicates "Stop," or a green light "Proceed."

RULE 2-Signals are always located to right of enginemen, considering engine going forward toward signal. Signals on other tracks must be disregarded.

RULE 3-Upper arm of Signal 52 in vertical position, or upper green light at night, shows clear main line for west bound trains on west bound main line.

Lower arm of Signal 52 shows track lined up into new train yard.

Upper arm of signal governs trains proceeding on east bound main line.

Lower arm governs trains proceeding into Fair Ground Spur.

Signal 31 governs east bound movements on west bound main line.

Signal 32 governs trains pulling out of new train yard.

Signal 47 governs west bound trains on west bound main line

Signal 49 governs west bound movements on east bound main line.

Signal 48 governs trains pulling out of Fair Ground Spur. (As this signal is at present taken out, and until put in, trains using this spur must be careful not to get past signal foundation until having received hand signal from towerman of green flag

by day and green light by night.)

Signal 4 governs east bound movements of trains on old main line

Signal 26 governs west bound movements of trains on old main line.

RULE 4-Cars without engine attached must never be left within Interlocking limits.

RULE 5-Trains pulling through Interlocking limits must display some light on rear of trains at night so towerman can see

RULE 6-Trains coming out of yard, wanting to go west on west bound main line, must pull by Signal 47 and not, proceed

RULE 7-Train receiving signal must always pull through Interlocking limits before they can receive any other route, excepting as shown in Rule 6.

RULE 8—In case of failure of automatic signals towerman will flag train through Interlocking limits with a green flag or green light by night. Any other signals by whomsoever must be disregarded.

Trains being flagged through Interlocking limits must proceed very carefully, not to exceed four miles per hour, looking out for

RULE 9-Trainmen and switchmen will be held equally responsible with enginemen, if proceed signals are given before automatic signals show "Proceed."

RULE 10—Trains approaching Signal 29 and wishing main line must give 4 short blasts of the whistle O O O

Approaching Signal 29 for Fair Ground Spur 3 long

Approaching Signal 52 for Main Line, 4 short O O O

Approaching Signal 52 for New Train Yard, 3 long -

Approaching Signal 31 for Main Line, 4 short O O O Approaching Signal 31 for Crossover onto east bound main line, 2 long, 2 short ——

Approaching Signal 31 for Fair Ground Spur, 3 long -

Approaching Signal 32-Same as for Signal 31.

Approaching Signal 49 for east bound main line, 4 short O O O O

Approaching Signal 49 for crossover into west bound main line, 2 long, 2 short —

Approachnig Signal 49 for New Train Yard, 3 long -

Approaching Signal 48-Same as for Signal 49.

Enginemen must answer signals by 2 short blasts of the whistle.

NOTE.—Trains and switch engines must be careful not to pass Signal 32, if this signal shows "STOP," as, if they do, and Signal 52 is cleared for west bound trains, Signal 52 will automatically assume the Stop position, to the danger of approaching trains. Other high arm signals being similar.

#### NOTE.

Surgeons will attend, when called upon officially, to all cases of ACCIDENT occurring to employes or passengers. In cases of SICKNESS it is the intention to limit medical service to the locality or town where a surgeon resides, unless some urgent necessity exists, for which distinct official authority must be had in accordance with established regulations.

Railway Officials are required to call on the nearest authorized surgeons whenever practicable, when surgical or medical services are needed. When such are accessible, the Association will not be responsible for bills for medical services rendered by any other physician. In the event of a sudden emergency arising from accident, if necessary proper surgical aid should be procured until the arrival of a regularly appointed surgeon, when the case should be placed in his charge, and in no case should the services of any but an authorized company surgeon be continued at the expense of the Railway Company or of the Association after such surgeon is able

Boarding and Nursing are furnished ONLY AT OUR OWN HOSPITALS. We are not responsible for bills incurred elsewhere nonlong and nursing are turnished ONLI AT OUR OWN HOSTIALS. We are not responsible for onls incurred eisewhere unless specially authorized or approved by the Chief Surgeon, and then only in critical cases of injury or illness occurring in the discharge of duty.

OP)
