REGISTERING AND BULLETIN STATIONS—Jamestown and Mandan.

STANDARD CLOCKS—Jamestown and Mandan

Freight trains enter and leave Jamestown Yard at a point just east of Pipestem River Bridge (the extreme west switch). See Rule 298 (e) and (f).

Maximum grades: Windsor to Jamestown. Before descending, freight trains must come to a full stop, air brakes must be tested and known to be working through and signal received by Engineer from rear end of train. Passenger trains will be governed by rule 552.

Maximum speed of passenger trains is one minute or 60 seconds per mile. This limit must never be exceeded.

All trains will slow to 10 miles per hour around first curve east of Missouri River Bridge.

East-bound passenger trains will use at least six minutes from Berner to Jamestown Coal Dock.

Engineers will not be required to consult register, except at initial or starting point.

Derail switch on east end Windsor passing track to be set and locked for derail only when cars left on this track. All other derail switches to be set and locked for derail at all times when not in use.

No. 2 will take siding for No. 5.

No. 8 will take siding for No. 7.

No. 3 will stop at McKenzie except Sunday.

Nos. 779 and 780 will carry male passengers.

Rule 288 is modified to the extent that extra trains may run ahead of third class trains without authority of train orders, and on that portion of road where single track block system is in effect inferior class trains may run ahead of second and third class trains without authority of train orders.

REGISTER TICKETS. Form No. 608.

Conductors of all trains (except passenger trains) will leave with operator of each open telegraph office between Berner and Bismarck (both inclusive, except Berner east bound) two register tickets properly filled out (including the time).

Operators must be watching for them, check time shown and correct if wrong, and report to Superintendent by wire any failure to leave them.

For light engines operators will fill out the register tickets.

Engineers of freight trains and light engines will secure one of these tickets from the operator, and if ticket is not furnished they will report by wire from the next open telegraph office.

At Bismarck, if the operator is not out to deliver register tickets, all freight trains and light engines will stop and secure same, and at other points light engines will stop and secure ticket if operator is not out.

Operator will file one copy of the tickets.

If operators are unable to find blanks thrown off by conductors, they will fill one out and hand to the engine crew of the following train. When an operator is absent for meals, a white marker with the letter "C" on it will be exposed to notify trains that the office is closed. Operators going on duty will furnish first train passing a blank reading "No train by since open at _____ M." time

NOTE.

Surgeons will attend, when called upon officially, to all cases of accident occurring to employes or passengers. In cases of sickness it is the intention to limit medical service to the locality or town where a surgeon resides, unless some urgent necessity exists, for which distinct official authority must be had in accordance with established regulations.

Railway Officials are required to call on the nearest authorized surgeons whenever practicable, when surgical or medical services are needed. When such are accessible, the Association will not be responsible for bills for medical services rendered by any other physician. In the event of a sudden emergency, arising from

accident, if necessary proper surgical aid should be procured until the arrival of a regularly appointed surgeon, when the case should be placed in his charge; and in no case should the services of any but an authorized company surgeon be continued at the expense of the Railway Company or of the Association, after such surgeon is able to assume charge of the case.

Boarding and Nursing are furnished only at our own hospitals. We are not responsible for bills incurred elsewhere unless specially authorized or approved by the Chief Surgeon, and then only in critical cases of injury or illness occurring in the discharge of duty

S. A. WILDER,
Train Master.

F. C. HUNTINGTON,
Train Master.

W. G. HOWLAND,
Chief Dispatcher.

		12.8										Average Speed Per Hour.	14.4

Registering and Bulletin Stations, Mandan and Mott. Standard Clock, Mandan. Branch Trains will protect themselves against main line trains between Junction and Mandan.

Above rating is based on trains consisting of loads only, and rating is calculated for an average speed of ten miles per hour.
 On Main Line for each car added to the number specified above, deduct 20 tons from rating of engine; for each car less than the number specified above, add 20 tons to rating of engine. On Branch Lines add or deduct 10 tons per car.
 In figuring tonnage of the car, less than 1,000 pounds will not be counted; 1,000 pounds or more will be counted one ton.
 To secure full tonnage rating a fraction of weight of car more than rating must be counted rather than a fraction less.
 Train dispatcher will determine rate to be handled when reduction is necessary account of weather conditions.

When engines are unable to haul the rating, engineers will designate to conductors the number of tons to be reduced and will wire the Superintendent why the reduction is necessary. It must be distinctly understood that the responsibility for reducing train below rating of engine must be assumed by the engineer and not by the conductor.
 This rating is made to govern ruling grades only, and will in no manner interfere with handling additional tonnage where the grades will permit.
 The above rating includes Class "W" Helper east and west from Jamestown and Class "L-9" Helper east from Mandan.
 In making up or filling out trains the following rules will be followed as far as practicable:
 Solid trains of loads or solid trains of empties.
 Where trains consist of both loads and empties, loads in the middle with empties divided between the head and rear ends of trains.
 Maximum tonnage for Main Line Local Freight Trains will be 20 per cent less than tonnage for Through Freights.
 Tonnage for Fast Freights and Stock Trains will be regulated by bulletin or special instructions from dispatchers.
