

# **NORTHERN PACIFIC RAILWAY COMPANY.**

## **IDAHO DIVISION**

# **TIME 41D TABLE**

**In Effect at 12:01 A. M. Pacific or 120th Meridian Time.**

**SUNDAY, SEPTEMBER 26, 1915**

---

**For the Government of Employes only. The Company reserves the right to vary therefrom at pleasure.  
Be positive that you have the Current Time Table and destroy all previous numbers. Read carefully the  
Special Rules and always have for reference a copy of TRANSPORTATION RULES,**

**E. C. BLANCHARD,  
General Manager.**

**I. B. RICHARDS,  
General Superintendent.**

**P. H. McCUALEY,  
Superintendent of Transportation.**

**J. L. DeFORCE,  
Superintendent.**

## RULES GOVERNING MOVEMENT OF TRAINS AT O. W. R. & N. CROSSING, SPOKANE.

**RULE 1**—Signal 52 is high arm semaphore on long crossover between old and new lines east of crossing. Upper arm governs westward movements on westward main line. Lower arm governs movements into yard.  
 Signal 50 is high arm semaphore on westward main line east of crossing. Upper arm governs westward movements on westward main line. Lower arm governs movements into yard.  
 Signal 29 is high arm semaphore on eastward main line west of crossing. Upper arm governs eastward movements on eastward main line. Lower arm governs movements to Fair Grounds tracks.  
 Signal 49 is dwarf signal located between eastward and westward main lines east of crossing and opposite signal 50. It governs westward movements on eastward main line, and westward movements from eastward to westward main lines through crossover east of crossing.  
 Signal 31 is dwarf signal located between eastward and westward main lines west of crossing, and opposite signal 29. It governs eastward movements on westward main line; eastward movements from westward main line to old main line through long crossover east of crossing, and eastward movements from westward to eastward main lines through short crossover east of crossing.  
 Signal 32 is dwarf signal located between westward main line and yard lead west of crossing. It governs eastward movements out of yard.  
 Signal 47 is dwarf signal located just west of crossing and north of westward main line. It governs westward movements on westward main line. Engines coming out of new yard and wanting to go west on westward main line must pull by signal 47 and not proceed until signal 47 shows clear.  
 Signal 48 is dwarf signal located just north of Fair Grounds track east of crossing. It governs movements from Fair Grounds track. (At present this signal is not in service, and movements from that track must be governed by hand signals from Towerman. Care must be used not to pass signal foundation until hand signal is obtained—yellow flag by day and yellow light by night.)

**RULE 2. Trains.**  
 Approaching signal 29 and wishing main line, must give 4 short blasts of whistle: 0 0 0 0  
 Approaching signal 29 for Fair Grounds, 3 long: \_\_\_\_\_  
 Approaching signal 29, 31 or 32, for old main line, 1 long, 2 short, one long: \_\_\_\_\_ 0 0 \_\_\_\_\_  
 Approaching signal 52 for main line, 4 short: 0 0 0 0  
 Approaching signal 52 for new yard, 3 long: \_\_\_\_\_  
 Approaching signal 31 for main line, 4 short: 0 0 0 0  
 Approaching signal 31 for crossover onto eastward main line, 2 long, 2 short: \_\_\_\_\_ 0 0 \_\_\_\_\_  
 Approaching signal 31 for Fair Grounds, 3 long: \_\_\_\_\_  
 Approaching signal 32, same as for signal 31.  
 Approaching signal 49 for eastward main line, 4 short: 0 0 0 0  
 Approaching signal 49 for crossover onto westward main line, 2 long, 2 short: \_\_\_\_\_ 0 0 \_\_\_\_\_  
 Approaching signal 49 for new yard, 3 long: \_\_\_\_\_  
 Approaching signal 50 for main line, 4 short: 0 0 0 0  
 Approaching signal 50 for new yard, 3 long: \_\_\_\_\_  
 Approaching signal 48 same as for signal 49.  
 Enginemen must answer signals by 2 short blasts of whistle.

### SPECIAL RULES FOR MOVEMENT OF TRAINS ON DOUBLE TRACK.

- 1—On double track, as indicated by division time table, rule 86 is modified to the extent that inferior class trains and extras may run ahead of second class trains without authority of a train order.
- 2—in manual block territory any train moving against the current of traffic must receive a proper clearance card at every open block office.
- 3—in automatic block territory rule 514 does not apply to trains moving against the current of traffic, and the rear of the train must be protected as prescribed by rule 99.
- 4—it is possible for a light engine using cross over in automatic signal territory to stand between the switches in such a manner as to release the signals when the switches are closed. Light engines and trains using crossover in automatic territory must have at least one switch open while engine is on any part of the crossover, except at Steno, Irvin and Parkwater.

- 5—to insure personal safety, operators having train orders or messages for passing trains should stand on the right-hand side of the train, and never stand between the tracks.
- 6—Rules 86 and D97 are modified to the extent that eastward from Marshall and eastward and westward from Spokane or Yardley any train may run with the current of traffic and ahead of superior class trains without orders. At Spokane or Yardley clearance card Form A must be obtained from Operator. At Marshall trains will be governed by interlocking signals. Operator must obtain authority from Dispatcher before issuing clearance card or clearing interlocking signals.
- 7—Except as modified above the Transportation Rules govern.  
 Double track switch Ramsey set for westward trains.  
 Double track switch Rathdrum set for eastward trains.  
 Double track switch Velox set for westward trains.

### SPECIAL RULES FOR MOVEMENT OF TRAINS UNDER AUTOMATIC BLOCK.

Trains pulling out of side tracks or spurs will open main line switch before car or engine is moved over fouling point.  
 At Cocolalla, where trains taking siding head in at first switch, signal indicators are placed at lap; two for each direction marked "Eastward" "Eastward Home" and "Westward" "Westward Home." Trains pulling off proper sidings will push the two indicators in the direction of their movement, one of which will indicate position of Home signal, and other if block in rear is clear.  
 At Sand Point, Marshall and Cheney telephone connected to Train Dispatcher's circuit is located at home signal.  
 At Kildee and Trout Creek automatic signals are on middle mast of bracket pole at telegraph office; top arm for old line, bottom arm for new line.

Following is amendment to Rule 504:  
 504-C. When a train is stopped by a block signal having two lights (called a home signal) on single track automatic block signal territory, it may proceed when the signal goes to caution or clear position, or if not immediately changed, by obtaining authority from the Train Dispatcher, or if unable to communicate with the Train Dispatcher, the train may proceed under protection of flag, to the first signal that indicates clear or caution.  
 504-D. When a train is stopped by a block signal on single track, it may proceed when the signal goes to caution or clear position, or if not immediately changed, it may proceed at once under caution, except when a train is proceeding under flag from the home signal, as provided in rule 504-C.

### RULES GOVERNING MOVEMENT OF TRAINS AT MARSHALL INTERLOCKING PLANT.

- 1—Eastward trains desiring to enter double track will call for signal by four short blasts of whistle O O O O
- 2—Westward trains will call for signals as follows:  
 To go on single track Northern Pacific main line, four long and one short \_\_\_\_\_ O  
 To go on Palouse Branch main line, one long, two short, one long \_\_\_\_\_ O O \_\_\_\_\_  
 To go on S. P. & S. main line, one long, one short, one long \_\_\_\_\_ O \_\_\_\_\_  
 To go on westward passing track, one long, one short, one long, one short \_\_\_\_\_ O \_\_\_\_\_ O
- 3—Bracket mast 600 feet west of switch to P. & L. main line governs eastward movements: Left bracket for N. P. main line; right bracket for movements from P. & L. line.
- 4—Mast 355 feet west of switch to S. P. & S. crossover governs eastward movement from S. P. & S. to N. P. main line.
- 5—Mast 400 feet east of tower governs movements from westward main line. Top arm to N. P. main line; middle arm to S. P. & S. and P. & L. lines; bottom arm to westward passing track.

- 6—Top arms on these masts are home signals for interlocking plant and in addition automatic block signals, and trains must observe automatic block rules in passing them.
- 7—The bottom arms, or short blade semaphores, are for use by Operator to move trains which are stopped by home signals: That is, after train is brought to stop it can, on receipt of caution indication of operator's signal, proceed through interlocking plant expecting to find track beyond obstructed.
- 8—Located between main lines and opposite westward signal mast is dwarf signal to control westward movements on eastward main line.
- 9—Between passing track and main line opposite S. P. & S. signal mast is dwarf signal to control eastward movements out of passing track.
- 10—Eastward trains will approach home signals under control.
- 11—When engines are stopped for water, they must back clear of interlocking limits and a clear or caution signal be obtained before passing through plant.
- 12—In switching moves engines and cars must pass clear of interlocking limits before reverse movements is made.

EASTWARD TRAINS ARE SUPERIOR TO TRAINS OF THE SAME CLASS IN THE OPPOSITE DIRECTION.

- REGISTERING STATIONS
- BULLETIN STATIONS
- STANDARD CLOCKS
- DERAIL SWITCHES—See Page 8.
- YARD LIMITS—Indicated by signs at proper locations.
- LAP SIDINGS—Cocolalla, Granite, Athol, Hauser, Otis Orchards. Trains taking siding head in at lap.
- CROSSOVER—Steno, Irvin, Parkwater and Hangman. Trailing point switches.
- FUSHER DISTRICT—Between east yard limit board Spokane and west yard limit board Cheney; and on S. P. & S. Railway from Junction switch Marshall to west switch at Mock.
- MAXIMUM GRADES—Between Spokane and Cheney.

## 8. SPEED RESTRICTIONS:

Maximum speed passenger trains one minute or sixty seconds per mile.  
 This limit must not be exceeded.  
 Through crossover and entering sidings: 15 miles per hour.  
 Through crossover Marshall: 35 miles per hour.  
 Pend Oreille River Bridge No. 18, one mile west of Sand Point: 30 miles per hour. Draw span: 15 miles per hour.  
 Granite Viaduct, Class W or heavier engines: 8 miles per hour. All other engines 15 miles per hour.  
 Granite Tunnel: Thirty miles per hour.  
 Parkwater-Spokane—First class trains run under control within yard limits in same manner as required of second and inferior class trains.  
 City or village ordinances restrict speed of trains over highway crossings within corporate limits as follows:  
 Athol: 15 miles per hour.  
 Rathdrum: 15 miles per hour.  
 Spokane: 8 miles per hour.  
 Cheney: 8 miles per hour.

**EASTWARD TRAINS ARE SUPERIOR TO TRAINS OF THE SAME CLASS IN THE OPPOSITE DIRECTION.**

1. Between Marshall and Cheney trains will be handled under separate block card system.
  2. Westward trains must receive special block card Form A at Marshall.
  3. Eastward trains must receive special block card Form B at Cheney.
  4. Exceptions on these cards must be complied with. If no exceptions, operator will insert the word "Blank."
  5. Westward trains take siding Cheney unless instructed to contrary.
  6. These cards must be turned in by Conductor to operators at Marshall and Cheney immediately on arrival.
  7. Eastward freight trains of 1500 tons or over must have ten to twenty retainers turned up on head end Marshall to Hangman.
  8. Eastward trains at Velox and Ramsey and westward trains at Rathdrum going on to single track will call for switch by four short blasts of engine whistle.
  9. Nos. 1, 2, 3, 4, 41 and 42 will register at Kootenai yard by ticket.
  10. Nos. 305, 306, 307, 308, 309 and 310 will stop on flag at all sidings and spurs.

Main line rating is based on loads having a gross weight of forty tons. At Spokane and Kootenai Daly tonnage computing machines will be used to give a draw bar pull equivalent to the rating shown. Leaving terminals conductors will be furnished statement of machine tons in their train and will fill out the difference between this and the intermediate rating, using machine tonnage as shown below.

Rating is based on trains consisting of loads only and is calculated for an average speed of ten miles per hour.

Train dispatcher will determine rate to be handled when reduction is necessary account of weather condition.

When engines are unable to haul the rating, Engineman will designate to conductors the number of tons to be reduced and will wire the Superintendent why the reduction is necessary. It must be distinctly understood that the responsibility for reducing train below rating of engine must be assumed by the Engineman and not by the conductor.

This rating is made to govern ruling grades only, and will in no manner interfere with the handling of additional tonnage where the grades will permit.

DR. A. S. WILLIAMS, Wilbur (S)  
DR. ED. RICKARDS, Coulee City  
DR. JNO. C. DWYER, Coeur d'Alene (S)

### NOTE

**Surgeons** will attend, when called upon officially, to all cases of ACCIDENT occurring to employees or passengers. In cases of SICKNESS it is the intention to limit medical service to the locality or town where surgeon resides, unless some urgent necessity exists, for which distinct official authority must be had in accordance with established regulations.

**Railway Officials** are required to call on the nearest authorized surgeons whenever practicable, when surgical or medical services are needed. When such are accessible, the Association will not be responsible for bills for medical services rendered by any other physician. In the event of a sudden emergency arising from accident, if necessary proper surgical aid should be procured until the arrival of a regularly

appointed surgeon, when the case should be placed in his charge, and in no case should the services of any but an authorized company surgeon be continued at the expense of the Railway Company or of the Association after such surgeon is able to assume charge of the case.

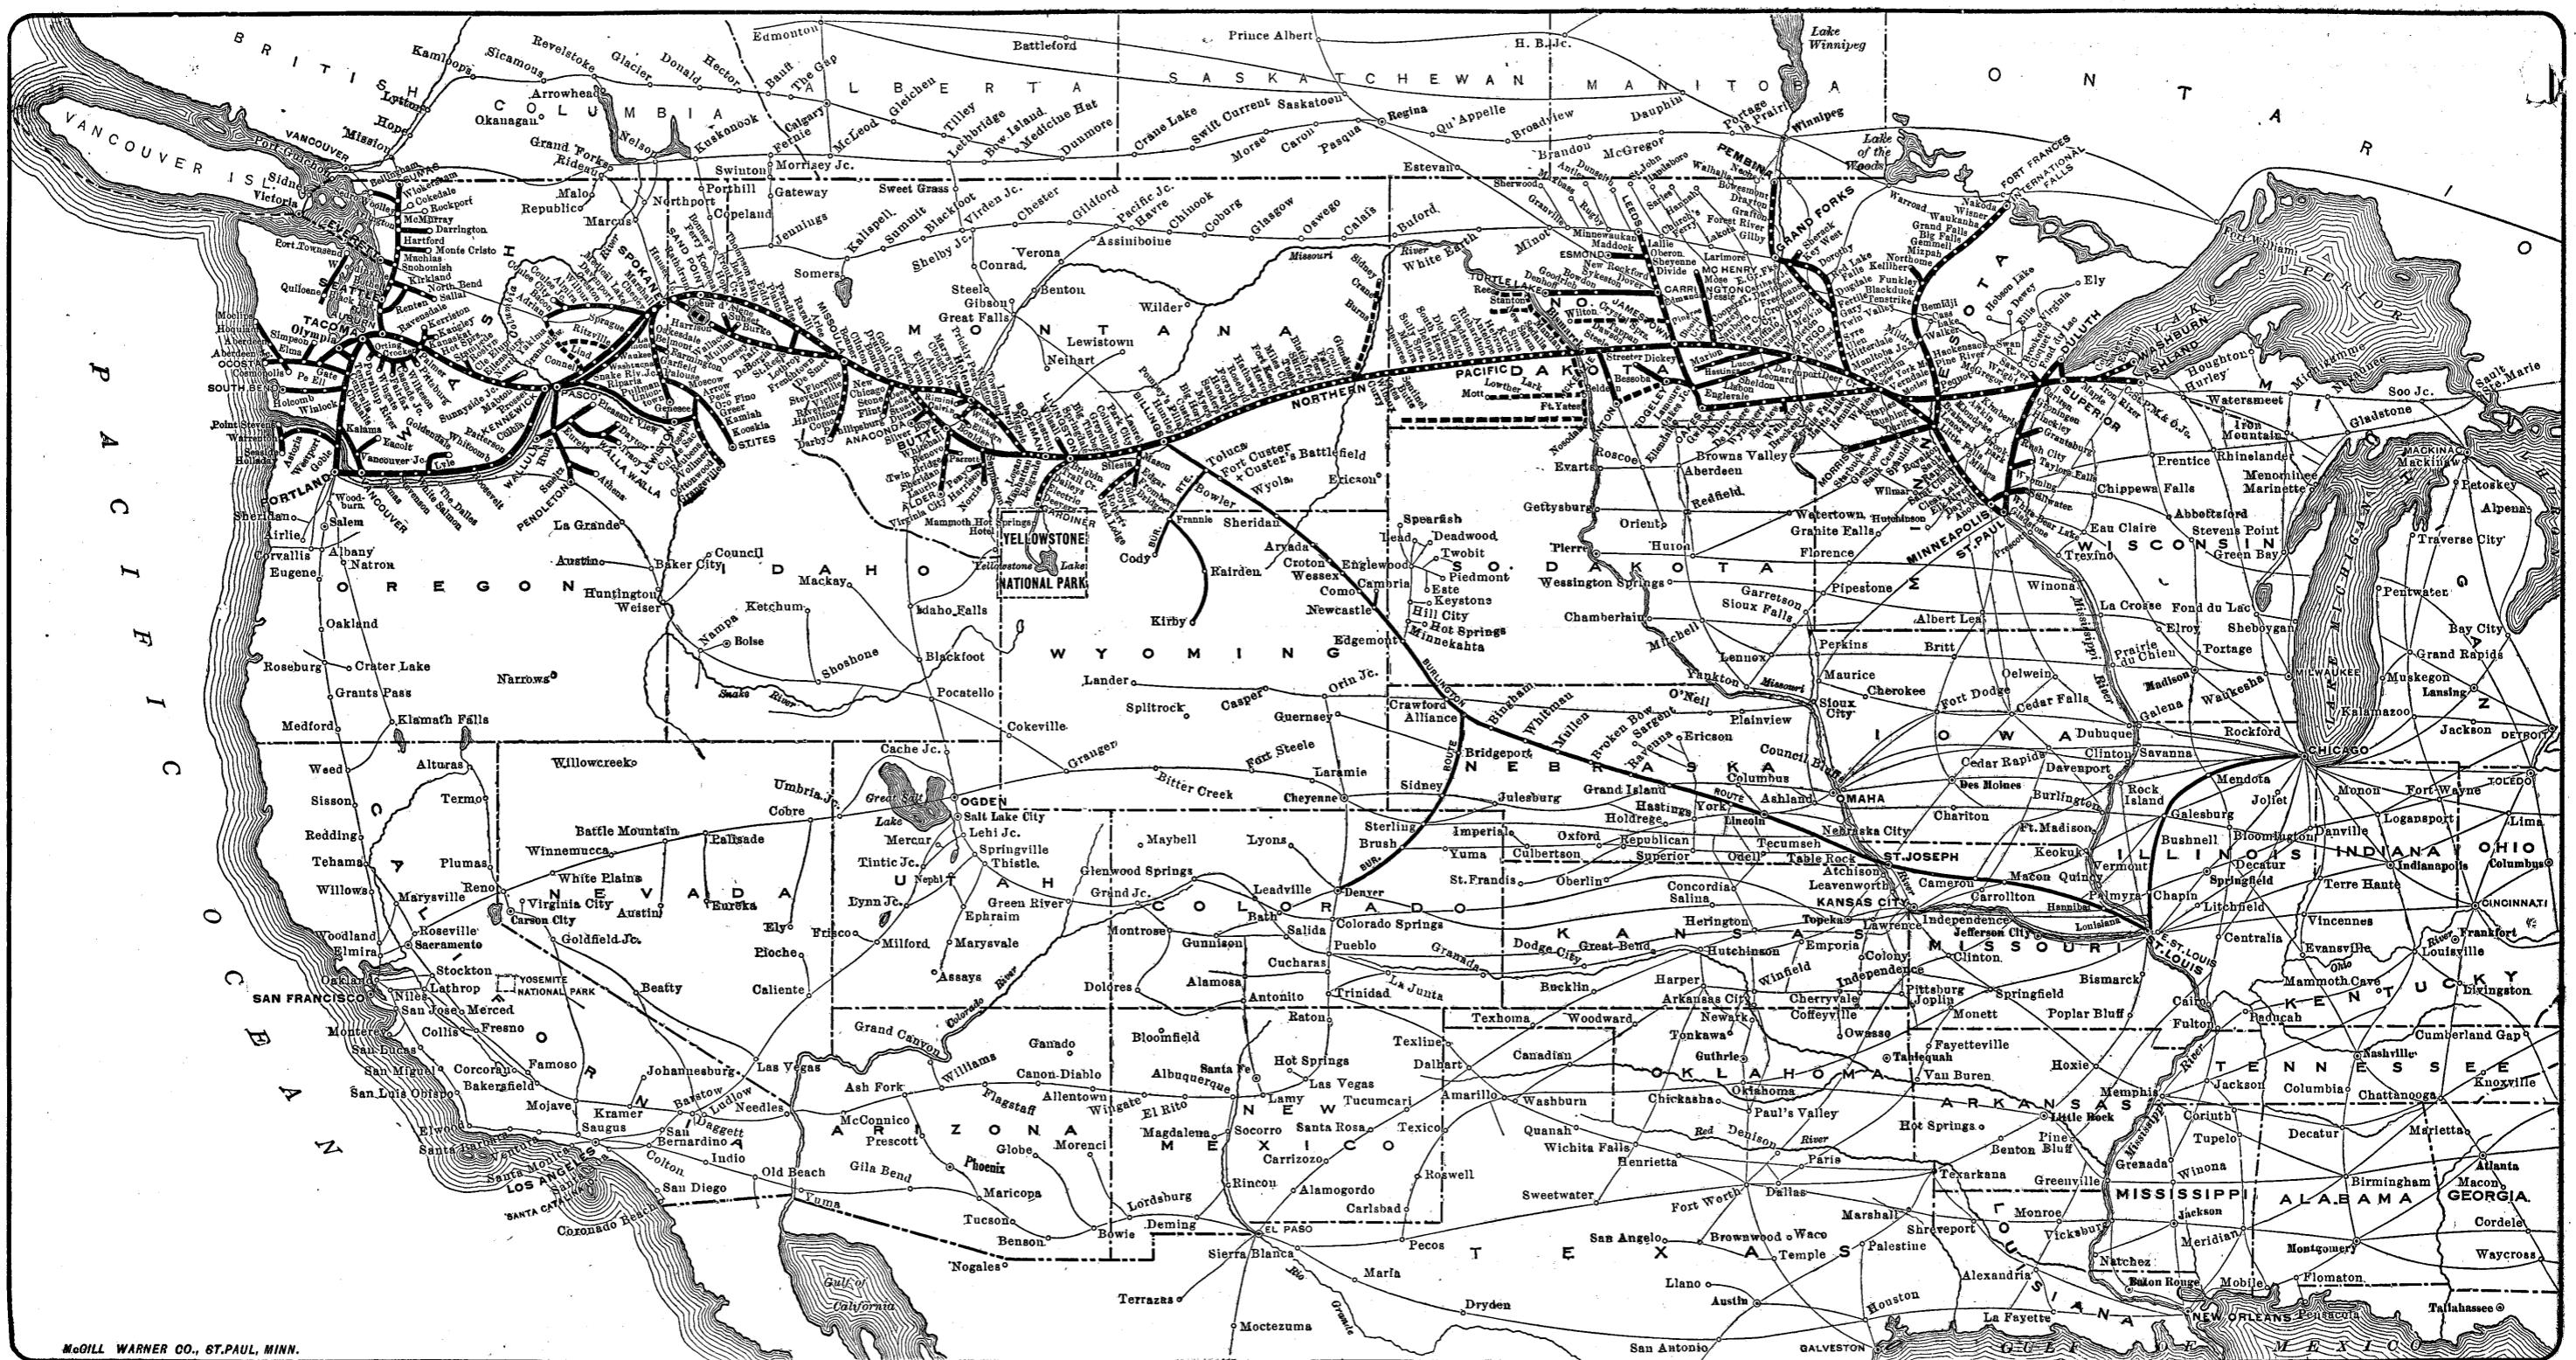

**Boarding and Nursing** are furnished ONLY AT OUR OWN HOSPITALS. We are not responsible for bills incurred elsewhere unless specially authorized or approved by the Chief Surgeon, and then only in critical cases of injury or illness occurring in the discharge of duty.

### FIRST SUB-DIVISION SPECIAL RULES.

1. Nos. 305 and 306 will run between Kootenai Yard and Kootenai through Passing Track. No. 306 arrives Kootenai 9:40 a. m. No. 305 leaves Kootenai 10:45 a. m.
2. Nos. 1, 2, 3, 4, 41 and 42 will register at Kootenai yard by ticket.
3. Junction switches Kildee and Trout Creek will be set for old main line. All trains using new line between Kildee and Trout Creek will come to full stop before passing Junction switches unless they have been furnished a train order stating that all superior trains due at or before time given have arrived or passed.
4. Extra trains will run via new line unless otherwise instructed, between Kildee and Trout Creek.
5. At Kildee and Trout Creek old line train order signal mast is on south side of bracket pole; new line mast on north side. Trains using line opposite to that on which scheduled will secure clearance before passing to single track.
6. At stations Kootenai to Paradise inclusive, Agents will secure authority from Superintendent to stop train No. 2 for passengers destined Saint Paul and East.
7. No. 3 stops at Belknap to let off passengers from Thompson Falls.
8. Nos. 41 and 42 stop on flag at all spurs for passengers.
9. Local freight trains will tie up on westward siding at Noxon.
10. **SPEED RESTRICTIONS:**  
Maximum speed Passenger Trains one minute or sixty seconds per mile. This limit must not be exceeded.  
Through crossovers and entering siding: 15 miles per hour.  
Thompson River Bridge 279 between Frost and Woodlin. Class W or heavier engines 8 miles per hour. All other engines 20 miles per hour.  
Beaver Creek Bridge, Old Line, 5 miles West of White Pine: Twenty-five miles per hour.  
Kildee for westward trains, Trout Creek for eastward trains, passing on to old line: 25 miles per hour approaching Junction Switch.  
Elk Creek Bridge, 1 mile East of Heron: 25 miles per hour.  
Cabinet Tunnel: 20 miles per hour.  
City or village ordinances restrict speed of trains over highway crossings within corporate limits as follows:  
Plains, 25 miles per hour.  
Thompson Falls, 8 miles per hour.

### FOURTH SUB-DIVISION SPECIAL RULES.

11. **YARD LIMITS**—Indicated by signs at proper locations.
12. **PUSHER DISTRICTS**—Between west switch Kendrick and east switch Moscow.
13. Mountain grade between Kendrick and Howell.
14. Special attention called to Rules 731 and 737 inclusive governing operations on mountain grade.
15. **DERAIL SWITCHES**—See Page 8.
16. All westward trains are required to get a clearance at Joseph. This will be issued from Dispatcher's Office of the Camas Prairie Railroad at Lewiston. All eastward trains are required to get a clearance at North Lapwai, clearing them from Joseph. This will be issued from Dispatcher's office at Spokane.
17. Nos. 311 and 312 will stop on flag at Kelley's Spur, Spokane County Farm and Freedom Spur.
18. No. 313 will stop on flag at Freedom Spur Sundays.
19. No. 314 will stop on flag at Freedom Spur Saturdays.
20. No. 313 will stop on flag at Spokane County Farm.
21. **SPEED RESTRICTIONS:**  
Through crossovers and entering sidings: 15 miles per hour.  
Howell to Kendrick, Passenger trains: one mile in two minutes. Freight trains: one mile in four minutes.  
Road crossing west of west switch Palouse: 8 miles per hour.  
Stop: Two hundred feet from O.-W. R. & N. crossings, Oakesdale, Garfield and Pullman.

McDILL WARNER CO., ST.PAUL, MINN.
