SPECIAL RULES

FIRST SUBDIVISION

(Main Line)

SPEED RESTRICTIONS.

- 1. Eastward passenger trains 30 miles per hour between extreme west switch Ellensburg yard and Ellensburg station.
- 2. Ten miles per hour through incorporated city limits of Cle Elum.
- 3. Maximum speed of descending passenger trains 30 miles per hour, and descending freight trains 20 miles per hour between Martin and Easton and between Stampede and Lester.
- 4. Maximum speed of ascending passenger trains 20 miles per hour and ascending freight trains 12 miles per hour between Easton and Martin and between Lester and Stampede as that is the maximum speed that curves are put up for. In case current of traffic is reversed eastward trains using westward track Martin to Easton and westward trains using eastward track Stampede to Lester must particularly observe these restrictions.
 - Westward freight trains must use a minimum of 35 minutes, exclusive of all delays, in running between Stampede station and the point where they stop at Lester.
- 5. Speed of Z-3 engines must not exceed 25 miles per hour at any time; this does not abrogate the 20 miles per hour descending and 12 miles per hour ascending speed restriction of freight trains on Cascade Mountain.
- 6. Speed of all trains through Stampede tunnel No. 3 must not exceed 15 miles per hour and must be so controlled that they can be stopped on emerging.
- 7. Twenty miles per hour over Tenth Subdivision of Tacoma Division switches at Palmer Junction.
- 7a. Speed of class W, W-1 and W-2 engines will not exceed 30 miles per hour at any point. This restriction does not abrogate other restrictions of lesser speed governing same class power.
- 8. Fifteen miles per hour through cross-overs and entering sidings.
- 9. Thirty miles per hour through interlocking plants.
- 10. Maximum speed of passenger trains is one minute or sixty seconds per mile. This limit must never be exceeded.
- 11. Yard Limits.-Indicated by sign at proper location.
- 12. Registering Stations.-Ellensburg and East Auburn. At East Auburn all trains register by ticket. Freight trains also register at Auburn Transfer. At Easton and Lester trains terminating will register arrival, and at Easton and Lester departing freight trains ascending will register whether "all air" or helper on rear. Palmer Junction is registering station for trains using tenth Subdivision of Tacoma Division only, which will register by ticket.
- 13. Eastward trains leave register ticket at Lester and procure register check at Easton. Westward trains leave register ticket at Easton and procure register check at Lester.
- 14. Bulletin Stations.-Ellensburg and Auburn Transfer. (Lester and Easton are bulletin stations for enginemen on helper engines.)
- 15. Standard Clocks .-- Ellensburg, Lester and Auburn Trans'er.
- 16. Mountain Grade.—Easton to Lester.
- 17. Helper District .- Between Auburn and Easton.
- 18. Lap Sidings are located at Thorp, Bristol, Tenaway, Nelsons, Maywood, Eagle Gorge, Kanaskat and Covington. (Trains taking siding will head in at lap.)
- 19. At Dudley and Humphrey, track No. 1, located next to main track, will be known as eastward siding. Track No. 2 will be known as westward siding.
- 20. At Lester .-- Track No. 1 west of double track switch, located 1,400 feet west of station, will be used as storage track. Track No. 2 as eastward siding.
- Track No. 3 as westward siding. 21. Descending freight train must not be permitted to leave Stampede until descending passenger train has arrived at Lester and descending freight train must not be permitted to leave Martin until descending passenger train has passed Easton.

41. FREIGHT TRAIN CONDUCTORS AND ENGINEMEN WILL COMPLY WITH THE FOLLOWING, CONCERNING THE HANDLING OF TRAINS THROUGH TUNNEL No. 3:

On whistling for either Martin or Stampede the engineman must place the handle of the brake valve in full release position and obtain 90 pounds train pipe pressure as promptly as possible. (Engineman must see that low pressure governor head does not exceed 90 pounds.) Following this he must obtain "Proceed" signal before entering tunnel No. 3, to be passed from conductor to head engineman by helper engine whistle and head brakeman. Conductor will not give this signal until the train pipe pressure in the caboose has been increased to at least 80 pounds.

No retaining valves need be used with trains of all empties through tunnel No. 3, but such trains must be stopped and all retaining valves turned up before leaving either Stampede or Martin. With other freight trains, before entering tunnel No. 3 turn up all retaining valves Westward, and all but the rear one-third Eastward, turning all up before leaving

If for any reason the train breaks in two or more parts while in tunnel No. 3, train and enginemen should arrange to get engines out of tunnel promptly as possible. If necessary, take engines and cars out in either or both directions. When portion of train is left in tunnel, same should be made secure by blocking and not moved out until smoke and gas has cleared and it can be done safely. Blocking will be found on walls of tunnel on right hand side going east, about 100 feet apart and six feet above the rail.

42. RULES COVERING THE OPERATION OF SINGLE TRACK BY STAFF SYSTEM BETWEEN STAMPEDE AND MARTIN:

at Stampede.)

No train, engine, or propelled car will run in either direction until engineman receives from operator a staff which must be retained and delivered to the operator at the opposite end of the block.

The possession of a staff makes the train superior to all other trains between Stampede and Martin.

The eastward train order signal at Stampede, and the westward train order signal at Martin, are interlocked with staff machines located in the telegraph office at Stampede and Martin, and except when used must be set normally at stop and cannot be cleared until the operator at opposite end of block returns staff to machine, which must not be done until rear of train has passed 309 feet beyond the signal. After signal has been cleared for a train entering the tunnel it must be restored to stop immediately after the rear of the train has passed the signal.

In order to use the switches in old Stampede yard, the staff must be used to unlock switch levers with, and levers

43. Special rules governing operation of trains and yard engines between East Auburn and Auburn and between East Auburn and Auburn Transfer.

No train or engine in either direction will occupy main track or wye between East Auburn and Auburn, or between East Auburn and Auburn Transfer, regardless whether such train or engine holds rights conferred either by time table or train orders (except switch engines going around wye upon authority of work order) without first procuring a card form "K." "L," "M" or "N" from operator at

- 22. When block for eastward trains is not clear operator at Martin will head such trains in on eastward siding to enable them to clear Tunnel No. 3.
- 23. Rule 316 is modified as follows: When the telephone is used, signalmen will transmit the words, represented by the figures.
- in Stampede station limits, but the old sidings between tunnels Nos. 3 and 4 must not be used for the meeting or passing of trains.
- 25. Normal position of double track switches at Easton and Stampede will be for westward trains.
- 26. Normal position of double track switches at Martin and Lester will be for eastward trains.
- All trains must approach double track switches under full control. 27.
- 28. Division; lower arm is automatic block (west home signal). Switch at Palmer Junction will be set for the First Subdivision line.
- 29. Engines must not run on Page Lumber Co.'s spur.
- 30. Derail switches are located as follows, and must be kept set in derailing position when not in use:
 - Ellensburg-East end of east yard. Ellensburg—Caboose track. Kountz—East end of siding. Cle Elum-East end of east extension. Easton-East end of siding. Easton-East end of No. 2 track. Easton-East end of Interchange track.
 - Switch lamps will not be maintained on above switches.
- at Auburn will be for Seattle leg of the wye. Switch target and switch lamp will show clear indication for Seattle leg
- 33. Mallet power must not be double-headed over bridges except between Easton and Lester.
- 34. Dead freight trains will fill to tonnage at Cle Elum.
- 35. No. 318 will stop on flag to unload express at Garibaldi.
- 36. On Sundays, special trains are operated on Roslyn Branch for the accommodation of passengers. Leave Cle Elum 10:00 a. m., 1:15 p. m., 5:00 p. m.
- Leave Beekman 10:45 a.m., 2:00 p.m., 5:45 p.m.
- 37. No. 4 will connect with No. 596 at Kanaskat.
- 38. No. 3 will connect with No. 595 at Kanaskat.
- 39.
- cautioned against throwing any refuse or articles, which might become unsanitary, off the train while passing through that territory.

Descending trains will carry 90 pounds train pipe pressure to Lester and to Easton. Following any stops during the descent, the engineman must fully recharge the brakes before starting and the conductor must not give the "Proceed" signal until at least 80 pounds is shown by the caboose gauge.

Eastward freight trains will stop at Lester to make terminal test, and at Easton to make examination of wheels and Brakes. Westward freight trains will stop at Easton to make terminal test, and at Lester to make examination of wheels and brakes. In addition to stopping at Lester, westward freight trains will stop at Kennedy (with caboose as close to telegraph office as possible) to make inspection of wheels and brakes.

If enginemen handling eastward freight trains find that fan at mouth of tunnel No. 3, Stampede, is in operation when passing vents, train must be stopped at once and engineer in charge of plant notified to stop the fans.

Conductor in charge of freight trains will wire operators at Martin or Stampede, as the case may be, when the have stockmen or messengers or, any one legitimately carried on train in excess of regular train crew so that operato can hand up sufficient number of respirators.

Auburn, East Auburn or Auburn Transfer properly filled out. Automatic block rules must also be observed. Cards must be surrendered

to operator at end of block immediately upon arrival.

pede or Martin. (Pusher staff will not unlock switches.)

24. All sidings between Tunnel No. 3 and westward switches of new sidings west of Tunnel No. 4 will be considered

At Palmer Junction, the upper semaphore arms are train order signals and govern movement of trains via first Subdivision; middle arms are also train order signals and govern movement to and from Tenth Subdivision of Tacoma

Stampede-West end of No. 2 track. Stampede-West end of Storage track. Lester-West end of roundhouse track. Lester-West end of No. 1 track. Nagrom-Spur track. Eagle Gorge-West end of Eastward siding. Kanaskat-West end of wye.

31. Position of "Wye" switches at Auburn will be ascertained before using. Normal position of switch at head of the wye

32. Electric coal bunker, located on west extension, Cle Elum, will not clear man on side of car or engine.

When making back-up movement, running test of air brakes must be made from rear of train. 40. All toilets in trains must be kept locked while in the limits between Headworks and Humphrey and all employees are

will have to be returned to normal position before staff can be removed. These tracks cannot be used for trains or engines getting into clear as the staff which is used for unlocking the switches must be returned to machine at Stam-

When a helper engine is used behind caboose, or on rear of passenger train, operators at Stampede will be prepared to deliver pusher staff to engineman. When engine is cut off at old Stampede, the pusher staff will be his authority to return to Stampede. (The pusher staff cannot be put into the machine at Martin, but must be returned to the machine

In tunnel section between double track switch at Martin and double track switch at Stampede, (A) flagging is not required. (B) Headlight and lighted markers will be used both day and night.

SPECIAL RULES-Continued

SECOND SUBDIVISION

1. Registering Stations-Woodinville, Sedro-Woolley, Wickersham, Everett and Sumas. All trains register by ticket at Kruse and G. N. Station, Snohomish.

2. Yard Limits-Indicated by sign at proper location.

- 2a. Switching Limits-Territory indicated by signs within which switching will be performed by Yard Crews.
- 3. Maximum Grades-Between Bromart and Woodinville.
- 4. Bulletin Stations-Arlington, Sedro-Woolley, Sumas and Everett.
- 5. Standard Clocks-Sedro-Woolley and Everett.
- 6. Helper District-Between Edgecomb and Arlington, limit 30 cars.
- 7. Helper District-Between Bromart and Woodinville.
- 8. No. 441 stop at Kruse for passengers destined to points north of Kruse on our own line.
- 9. Speed Restrictions-Fifteen miles per hour through cross overs and entering sidings.
- Thirty miles per hour through interlocking plants.

5

- Thirty-five miles per hour around curves on Maltby hill.
- Ten miles per hour between Maple Street (located 600 feet east of depot) and Burke Avenue (located 2500 feet west of depot) at Arlington.
- Twelve miles per hour between west switch Roger and Delta wye.
- Thirty miles per hour at any point of W, W-1 and W-2 engines, this restriction does not abrogate other restrictions of lesser speed.
- 10. Clearance Exceptions-Trains need not obtain clearance at Wickersham from 11:00 p.m. to 6:30 a.m., unless stop signal is displayed.
- 11. Engines must not go in beyond 50 feet from frog on Weyerhauser spur, Everett, account 16-degree curve.
- 12. Trestle No. 3 of Everett Pulp and Paper Mill Company at Lowell is unsafe for engines.
- 13. No train or engine will occupy main track in either direction between Lowell and Everett or between Everett and G. N. Junction regardless whether such train or engine holds rights conferred either by time table or train orders without first procuring card order from Operator Lowell, Everett, G. N. Junction or Delta wye, properly filled out. Cards must be surrendered to Operator at end of block immediately upon arrival. N. P. eastward trains secure card order at Delta wye, authorizing movement G. N. Junction to Everett; N. P. westward trains will turn in card received at Everett, authorizing movement to G. N. Junction at Delta wye.
- 14. Whistle Signals for Delta Wye Interlocker-N. P. westward trains: one long, one short, one long. N. P. eastward trains: two long, one short, one long.
- 15. Normal Position of Main Track Switches-Bromart and Edgecomb will be for Second Subdivision Main track. Normal position of west siding switch at Kruse and east siding switch at G. N. station Snohomish will be for main track, N. P. trains entering or leaving G. N. main track at these points will go through crossover instead of siding unless otherwise instructed.

Normal position of junction switch at G. N. Junction will be for N. P. main track. Normal position of main track switch, west of Lowell, will be for G. N. main track.

RAILROAD CROSSING AT GRADE.

- 16. P. C. R. R. crossing at Renton. P. C. R. R. crossing two miles west of Renton. Campbell Lumber Co. crossing at Campton. Two C. M. & St. P. R. R. crossings between G. N. Junction and Roger. M. & A. crossing, 1.3 miles west of Kruse. Two G. N. crossings at Sedro-Woolley. G. N. crossing at E. K. Wood mill Bellingham. B. & N. crossing just east of Sumas. C. M. & St. P. crossing 300 feet west of Ebey Junction. G. N. crossing 5,000 feet west of Lowell on new Everett freight house track. P. S. & C. Ry. crossing 1.3 miles east of Clear Lake. B. & N. Ry. crossing 2.1 miles west of Deming.
- 17. Crossing Gate situated on new Everett freight house track at crossing of G. N. track located (5,000) feet west of Lowell. Normal position blocks Northern Pacific track. When N. P. trains or engines use this crossing, gate must be unlocked and swung to block G. N. track and locked in that position while crossing is in use, after which gate will be locked in normal position across N. P. tracks.
- 18. Crossing Gate situated at G. N. crossing near E. K. Wood Mill at South Bellingham. Normal position blocks N. P. track. When N. P. trains or engines use this crossing, gate must be unlocked and swung to block G. N. main line and locked in that position while crossing is in use, after which gate will be locked to normal position across N. P. tracks.

- 19. Crossing Gate situated where Puget Sound & Baker River Railway Company track crosses N. P. old line just west
- 21. P. C. R. R. Crossing at Renton is protected by derails located 75 feet east and 75 feet west of the crossing and operated track and remain there until train has cleared both derails; then line back to derail.
- 22. Derail Switches are located as follows and must be kept set in derailing position when not in use: Edgecomb-M. &. A. connection. Arlington-East end House Track. Arlington-Lead track west end. Bryant---New M. & N. connection. Bryant-West end siding. Pilchuck-East end siding. Holo-Spur track. Montborne-East end siding. Chilco-Spur track Clear Lake-West end siding. Sedro-Woolley-G. N. transfer track. Loggie-Snur track Thornwood-West end siding. Prairie—Connection to old line. Wickersham-Christie's spur. Lovo-Spur track.
- 23. No engines of any class must cross or use bridge on Comar siding. No engines of any class must go beyond right-of-way line on Clipper Shingle Co.'s track connected from McDonald's spur, nor beyond right-of-way line on Milldale spur. Class S or heavier power must not go beyond right-of-way line on Morgood spur. Class W or heavier power must not go in on following spurs and tracks: Monte Cristo spur-Snohomish.
 - East end No. 3 track-Arlington.
 - Brown and Kountz spur-Arlington.
- Tiloh

Cream and Cannery spur, and Transfer track-Woolley. Class S power is also restricted from use of above spurs and tracks, except East end No. 3 track-Arlington, and may go in as far as bridge at Tiloh.

- Class "W" or "Y5" engines must not use west leg of wye, Wickersham. Class "W" engines cannot turn on table at Woodinville. East and west connections with Comar log spur are not safe for N. P. engines at points 50 feet from main track.
- 24. No power heavier than Class "C" engines coupled together may cross Bridge No. 39 on Fifth Subdivision or Truss bridges Nos. 1, 2, 4, 6, 7, 9 and 12 on Eighth Subdivision.
- 25. No engine heavier than Class F-1 can be run on Fifth, Eighth and Ninth Subdivisions. No engine heavier than Class W can be run over Second, Fourth, Sixth and Seventh Subdivisions.
- 26. All Eastward freight trains will come to full stop at Public Road crossing just east of Hartford station to clear Hartford Eastern Ry. switch and ascertain that track is clear before proceeding.

LOCATION DRAW SPANS.

27. Snohomish River bridge, just east of Snohomish. Skagit River bridge between Sedro-Woolley and Clear Lake. Ebey stop before crossing, giving whistle signal before proceeding.

of Sedro-Woolley. Normal position blocks N. P. track; same procedure as at South Bellingham.

by switch stand between the P. C. R. R. tracks. NORMAL POSITION OF DERAILS IS AGAINST N. P. TRAINS. All trains will stop to clear derails, brakeman will go ahead and line up for N. P. track, cross to opposite side of

Do not exceed speed of 4 miles per hour on Nestos spur account 18-degree curve and rails not braced.

Slough and Snohomish River bridge on Everett Branch between Snohomish and Lowell. All trains come to full

SPECIAL RULES-Continued

- 28. Conductors in charge of freight trains which are using helper engines behind caboose on Cascade Mountain will personally inspect and test levers and coupling pins and ascertain that same are in working condition, so that when the engine is cut off ascending while running at Martin or Stampede, there will be no failure to uncouple and in all cases the lever must be lifted on both the caboose and the engine. This movement must be personally supervised by the conductor.
- 29. Eastward freight trains between Auburn and Stampede and westward freight trains between Easton and Martin using helper power on rear will be governed by following rule: When necessary to take slack to start the train, the engine on rear of train will in all cases take the slack.
- 30. In order to facilitate the terminal test of air brakes on freight trains at Lester and Easton, as required by Transportation Rule No. 703, engineman who is handling the air brakes will, before the engine is detached to take coal, water, or do station work, make a straight twenty pound reduction from maximum brake pipe pressure with the automatic brake valve. As soon as the brake valve has stopped exhausting, engineman will give one blast of the whistle. Trainmen will not close angle cock to detach engine until this signal is given. Immediately after the brakes have been applied the conductor (or the person whom he may delegate) will make a car to car inspection of the brakes. Defect card form 684, properly filled out, must be attached to any car on which the air brake has failed to apply. This inspection must be completed within fifteen (15) minutes after the brake application. The air must not be coupled into the train from the helper or road engine until the enginemen have been informed that the inspection has been completed. If, for any reason, the road engine is not detached, the brakes must be applied and the test made as outlined above.
- 31. When a passenger train is furnished two helper engines over Cascade Mountain and one engine is a class "S-4" and the other a class "W," the class "W" engine must be placed on the head and the class "S-4" engine on the rear of train.

THIRD SUBDIVISION (ROSLYN BRANCH)

36. Bulletin and Registering Station-Cle Elum.

Maximum Grades-Cle Elum to Lakedale. Derail Switch—Cle Elum, upper switch at the head of wye toward Roslyn, will be set for west leg. Roslyn coal train is required to come to a full stop above this switch. The derail switch on the main line, nearly in front of scale house at Roslyn, will be left set to act as derail to prevent cars running down main line track toward Cle Elum. No engines of any class must pass under the tipple tracks on the Roslyn Fuel Company's tracks at Beekman.

FOURTH SUBDIVISION (BELT LINE)

37. Registering Stations-Woodinville and Black River. Speed Restrictions-Fifteen miles per hour through cross-overs and entering sidings. Twenty miles per hour Class "W" engines between Black River and Woodinville. All trains send man ahead to line derails and flag across P. C. R. R. crossing at Renton. Engines must not enter Glass Works spur at Renton. Engines must not go beyond frog on S. & R. V. interchange track at Renton account 30% curve. Station at Kirkland is located 2250 feet east of siding. Helper District-Woodinville to Kirkland, limit 30 cars. Normal position Renton leg wye switch Black River, set for Tacoma leg of wye.

FIFTH SUBDIVISION (SNOQUALMIE BRANCH)

38. Registering Stations-Woodinville and North Bend. Maximum Grades-Issaquah to Preston. Yard Limits-Indicated by sign at proper location. Speed Restrictions-Fifteen miles per hour through cross-overs and entering sidings. Twenty miles per hour over truss bridges and high trestles.

Ten miles per hour crossing Raging River Bridge 39.

Four miles per hour between Bridge 49 and Snoqualmie Falls.

Descending trains must not exceed schedule time on Preston and Fall City grades.

All trains leaving Preston must keep at least fifteen minutes apart.

Nos. 923 and 924 will carry adult male passengers holding proper transportation between Woodinville and North Bend. Women and children must not be carried on these trains.

West wye switch at North Bend will be lined for wye.

SIXTH SUBDIVISION

(LOWELL LINE)

39. Registering Station-Snohomish. Bulletin Station-Snohomish.

Yard Limits-Indicated by sign at proper location.

Speed Restrictions-Fifteen miles per hour through cross-overs and entering sidings. Class W engines 15 miles per hour between Snohomish and Lowell. Six miles per hour over Snohomish and Ebey Slough drawbridges.

No steam or electric trains will occupy main track in either direction between Snohomish and Lowell, without first procuring Card Order from operator at Snohomish or Lowell, properly filled out. Cards will not be issued for steam trains to follow electric trains, until electric trains have cleared block. Cards must be surrendered to operator at end of block immediately upon arrival.

Look out for trolley wires between tell tales at Snohomish and Ebey Slough bridges. Wires will not clear man on top of box car.

Trestle No. 3 of Everett Pulp & Paper Mill Co. at Lowell is unsafe for engines.

Trains of 60 cars will use 12 retainers.

Trains of 80 cars will use 18 retainers.

Same to be turned up on cars from the head end alternating by using the retainer on every other car, or the first, third, fifth, etc. On trains containing less than sixty cars, retainers will be furnished by request of the engineman but not to exceed ten on such trains. These retaining valves must be turned down when coming into East Auburn and before engine passes over the hump at bridge between East Auburn and east leg of the wve switch.

- No. 734, reading: "Helper engines, when used on rear of freight trains, must be in advance of cars insufficient in strength to safely resist the push of such engines."
- electric headlight, the engine equipped with the electric headlight must be the leading engine.
- fore assigning them to flagging duties.

(HARTFORD LINE)

40. Registering Station-Snohomish. Yard Limits-Indicated by sign at proper location. Bulletin Station-Snohomish.

Helper District-Between Snohomish and Edgecomb, limit 30 cars. Speed Restrictions-Fifteen miles per hour through crossovers and entering sidings. lass "W" and Y2 engines twenty miles per hour between Snohomish and Edgecomb Clearance Exceptions-Trains need not obtain clearance at Snohomish from 12.30 a.m. to 6.30 a.m. unless stop signal is displayed.

Passing track at Machias is located just west of the station, westward trains taking siding at this point will head in at crossover just west of depot. Eastward trains taking siding will head in at extreme west switch.

EIGHTH SUBDIVISION (DARRINGTON BRANCH)

41. Registering Stations-Arlington and Darrington.

Bulletin Station-Arlington. Yard Limit-Indicated by sign at proper location. Speed Restrictions-Fifteen miles per hour through cross-overs and entering sidings. Move under control where slides and washouts are liable to occur. Track beyond 400 feet from frog on U.S. spur at Darrington is unsafe for engines. Trains handling logs will not exceed ten miles per hour over Howe Truss bridges Nos. 2, 7, 11-1, 18, 19 and 22.

NINTH SUBDIVISION (BELLINGHAM BRANCH)

42. Registering Stations-Wickersham and Bellingham. Bulletin Station-Bellingham.

Yard Limit—Indicated by sign at proper location. Maximum Grades-Larson to Bellingham and Mirror Lake to Wickersham. Speed Restrictions-Fifteen miles per hour through cross-overs and entering sidings. Six miles per hour over bridge 20 (Silver Beach). Eight miles per hour over street car crossings at Kentucky Street, Bellingham. Eight miles per hour between Kentucky Street and Bellingham depot. Six miles per hour over street car crossing between Silver Beach and Larson. All trains come to full stop before crossing Holly Street, Bellingham. Flagman precede train with red flag or light. Fifteen miles per hour at any point between M. P. 5 and M. P. 8. Normal position wye switch at Wickersham be set and locked for east leg. Derail Switch-Mirror Lake, Liberty Lumber Co.'s spur. Spur at Liberty Mill at Mirror Lake not safe for engines.

32. Westward freight trains consisting of sixty cars or more, regardless whether part empties and part loads, or all empties, or all loads, will use retaining valves on head portion of train between Lester and Auburn as follows:

33. Eastward or westward trains furnished one class "Z" and one class "W" helper engine at Easton or Lester, will place the class "Z" engine ahead of the caboose to go through the tunnel and the class "W" behind the caboose to be detached at the portal of the tunnel. Trains using a single helper, class "W" or lighter, may place such engine behind the caboose and detach at portal of tunnel. These instructions do not annul or modify Transportation Rule

34. When two helper engines are coupled together descending on mountain grade, and one engine is not equipped with

35. In the State of Washington, conductors of passenger trains consisting of four or more cars, and freight trains consisting of 25 or more cars, must know that brakemen has had at least one year's experience in train-service be-

SEVENTH SUBDIVISION

AUTOMATIC BLOCK SIGNALS.

- 44. Note following amendment to automatic block Rule 504: "504-C. When a train is stopped by block signal having two lights (called the home signal) on single track, automatic train may proceed under protection of flag, to the next signal that indicates clear or caution.'

NOTE.

Surgeons will attend, when called upon officially, to all cases of ACCIDENT occurring to employes or passengers. In cases of SICKNESS it is the intention to limit medical service to the locality or town where a surgeon resides, unless some urgent necessity exists, for which distinct official authority must be had in accordance with established regulations.

Railway Officials are required to call on the nearest authorized surgeons whenever practicable, when surgical or medical services are needed. When such are accessible, the Association will not be responsible for bills for medical services rendered by any other physician. In the event of a sudden emergency, arising from accident, if necessary proper surgical aid should be procured until the arrival of a

regularly appointed surgeon, when the case should be placed in his charge, and in no case should the services of any but an authorized company surgeon be continued at the expense of the Railway Company or of the Association after such surgeon is able to assume charge of the case.

Boarding and Nursing are furnished ONLY AT OUR OWN HOSPITALS. We are not responsible for bills incurred elsewhere unless specially authorized or approved by the Chief Surgeon, and then only in critical cases of injury or illness occurring in the discharge of duty.
