EASTWARD TRAINS ARE SUPERIOR TO TRAINS OF THE SAME CLASS IN THE OPPOSITE DIRECTION.
MANUAL BLOCK—BETWEEN JAMESTOWN AND ELDRIDGE 7:00 a. m. to 7:00 p. m.; BETWEEN JAMESTOWN AND BERNER 7:00 p. m. to 7:00 a. m.
Automatic Block—East end Mandan yard from a point 1900 feet West of the junction switch to Ninth Sub-division (Mandan North Line) to a point 7500 feet East thereof, and that portion of the Mandan North Line from junction switch to a point 300 feet West, and East switch of lead, and also cross over from main line to lead.

Nos. 779 and 780 will carry adult male passengers.
 Nos. 3 and 4 will take water at Dawson.
 Nos. 7 and 8 will stop at Jamestown Shops opposite storeroom to discharge and receive company express.
 Passenger trains stopping at Crystal Springs to discharge or take on passengers will make stop at building just east of crossing at east end of siding, instead of telegraph office.
 The first switch leading to the north side of yard, west of the James River bridge at Jamestown, is the Junction with Third Sub-division (Devils Lake Branch). See Rule 98.
 The extreme east switch on Eastward track at Jamestown, is the Junction with Second Sub-division (James River Branch). See Rule 98.
 The first switch north of main track at extreme east end Mandan yard is the Junction with Ninth Sub-division (Mandan North Line). See Rule 98.

The first switch west of main line switch of lead to east end of Mandan yard is the Junction with Eighth Sub-division, (Mandan South Line) see Rule 98.
 After using the standpipe at Ladoga, the spout must be left pointing west.
 Pusher engines helping freight trains to Windsor will not cut off until the west switch of north siding is reached.
 Maximum speed of passenger trains is one minute, or sixty seconds per mile. This limit MUST NEVER be exceeded

EASTWARD TRAINS ARE SUPERIOR TO TRAINS OF THE SAME CLASS IN THE OPPOSITE DIRECTION.

Tracks inside yard limit boards at Linton are joint with the C. M. & St. P. Ry. While using joint tracks, trains will give precedence to C. M. & St. P. trains of superior class. See Special Rules and Instructions on pages 5 and 6.

EASTWARD TRAINS ARE SUPERIOR TO TRAINS OF THE SAME CLASS IN THE OPPOSITE DIRECTION.

See Special Rules and Instructions on pages 5 and 6.

EASTWARD TRAINS ARE SUPERIOR TO TRAINS OF THE SAME CLASS IN THE OPPOSITE DIRECTION.

EASTWARD TRAINS ARE SUPERIOR TO TRAINS OF THE SAME CLASS IN THE OPPOSITE DIRECTION.
AUTOMATIC BLOCK—EAST END MANDAN YARD—See Page 1.

Nos. 791 and 792 will carry adult male passengers.
 See Special Rules and Instructions on pages 5 and 6.

Nos. 163 and 164 will stop at Rock Haven on flag.

Ninth Sub-division first class trains will protect themselves against First Sub-division first class trains between junction switch one mile east of Mandan and Mandan passenger station.

Switch back track at Waterworks Spur 3 1/2 miles north of Mandan will be lined up for the industry track in order to act as derail.

EASTWARD TRAINS ARE SUPERIOR TO TRAINS OF THE SAME CLASS IN THE OPPOSITE DIRECTION.

Nos. 789 and 790 will carry adult male passengers.
 See Special Rules and Instructions on pages 5 and 6.

Eighth Sub-division first class trains will protect themselves against First Sub-division first class trains between junction switch one mile east of Mandan and Mandan passenger station.

SPECIAL INSTRUCTIONS.

STANDARD CLOCKS.

1. Jamestown Dispatcher's Office, Jamestown Yard Office, Mandan, Carrington.

BULLETIN STATIONS.

2. Jamestown, Mandan, Carrington, Esmond, Linton.

REGISTERING STATIONS.

3. Jamestown, Mandan, LaMoure, Independence, Oakes, Pingree, Carrington, Oberon, Leeds, Wilton, Turtle Lake, Esmond, (McKenzie for Seventh Sub-Division only), Linton, Mott, Killdeer.
Enginemen will not be required to consult register except at initial or starting point. See Rule 83-a.

MAXIMUM GRADE.

4. Windsor to Jamestown.

MAXIMUM GRADE OPERATION.

5. Before descending maximum grade, freight trains must come to a full stop, air brakes must be tested and known to be working through and signal received by engineman from rear end of train. Passenger trains will be governed by Rule 703. On freight trains eastward, Windsor to Jamestown, retainers will be used; conductors and enginemen will be governed by instructions contained on pages 277 to 280, inclusive, in the Book of Instructions for Maintaining and Operating Air Brakes and Signal Apparatus. Conductor will instruct head brakeman to ascertain from engineman the number of retainers he desires set up to insure control of train.

The passing track at Oswego being on maximum grade, conductors and enginemen must be careful to set up enough retainers at Windsor to insure their being able to make the stop at Oswego in case there is a train to be met there. Special attention of all concerned is called to the rules on pages 126 to 128, inclusive, in the Book of Rules and Regulations of the Operating Department, which apply particularly to maximum grades.

When stop is made for air test in compliance with the foregoing, conductors and enginemen will give brakemen ample time to make an inspection of train before departing. Head brakeman will go back and rear brakeman will go forward looking train over until they meet, and conductor, before giving signal to proceed, must know that this has been done.

When stop is made at Cleveland for any purpose, air test and inspection can be made at that point if desirable and when so done it will not be necessary to stop at Windsor for this purpose.

When necessary for conductor to go to office for orders, or for any other purpose, and the inspection of rear portion of train can be made by conductor when so doing, rear brakeman instead of conductor will protect rear of train, and conductor will make the inspection.

HELPER DISTRICTS.

6. Jamestown to Windsor; Mandan to Missouri River Bridge; First Sub-Division.
Jamestown and point one and one-half miles east, Second Sub-Division.
Jamestown to Parkhurst, Third Sub-Division.

YARD LIMITS.

	Linton		

LAP SIDINGS.

8. Eldridge, Windsor, Cleveland, Medina, Crystal Springs, Ladoga, Steele, Driscoll, Sterling and Burleigh. Trains taking siding will head in at the lap.

REGISTER TICKETS (FORM 608).

9. Conductors of all trains (except passenger trains) will leave with operator at each open telegraph office between Berner and Bismarck, both inclusive except Berner eastbound, two register tickets properly filled out (including time). Operators must be watching for them, check time shown and correct if wrong, and report to Superintendent by wire any failure to leave them. For light engines, operators will fill out the register tickets. Enginemen of freight trains and light engines will secure one of these tickets from the operator, and if ticket is not furnished they will report by wire from the next open telegraph office. Light engines will stop and secure ticket if operator is not out. Operator will file one copy of ticket. If operators are unable to find blanks thrown off by conductors, they will fill out one and hand to the engine crew of the following train. When an operator is absent for meals, a white marker with the letter "C" on it will be exposed to notify trains that office is closed. Operators going on duty will furnish the first train passing a blank reading, "No train by since open at.....M."

AT JAMESTOWN.

10. ALL TRAINS will move between, first switch leading to the north side of yard west of the James River Bridge, and Pittsburgh Avenue, prepared to stop unless the main track is seen or known to be clear. Eastward Third Sub-Division trains, except No. 158, will come to a stop before striking curve parallel with the east yard lead, and before starting will sound whistle as a warning to switchmen and others who may be working on the east yard lead. Owing to the grade east of Fifth Avenue, passenger enginemen will leave the brakes fully applied before cutting off engine. Hand brakes must be set on all cars left on coach track and spur tracks east of Fifth Avenue. Employees must not depend upon air holding cars. In setting out cars on tracks between Sixth Avenue and James River Bridge, same requirements will apply. Switch Foremen will be held responsible for knowing that their helpers comply with these instructions, and conductors will be held responsible for knowing that their brakemen comply with them. Westward first class trains and passenger extras will use first track south of passenger station; eastward first class trains and passenger extras will use second track south of passenger station; westward second and inferior class and extra trains will use third track south of passenger station; eastward second and inferior class and extra trains will use fourth track south of passenger station. Switchtenders are located at Pittsburgh Avenue and at Sixth Avenue. Westward first class trains will come to a stop east of Pittsburgh Avenue unless switches are right and track clear. Westward second and inferior class and extra trains will come to a stop east of Pittsburgh Avenue. Helper engines returning after helping trains on Third Sub-Division will come to a full stop west of the connection between track 19 and the Third Sub-Division main track, and will move slowly on the Third Sub-Division between this point and east end of yard, looking out for switch engines moving on leads and using cross-overs on north side of yard.

MISCELLANEOUS.

11. First class trains running against the current of traffic on double track must move within yard limits prepared to stop unless the main track is seen or known to be clear.
12. Conductors of work trains will issue instructions to their flagman in writing, except when flagman goes back immediately to stop approaching trains. If necessary to modify instructions by telephone, flagmen should write instructions in order that they will remember and not become confused as to the instructions received.
13. Trains setting out cars at Bismarck when no switch engine there will be governed as follows:
All merchandise cars must be left on the house track.
Merchandise cars must be placed at freight house platform if there is room. If no room at platform leave them west of freight house on house track.
No. 2 track is not to be used in setting out cars except when no other track is available.
14. At Wilton No. 171 will leave their coaches at the end of main track opposite depot to be picked up by No. 172. All trains approaching Wilton will expect to find these coaches on the main track at depot between the arrival of No. 171 and the departure of No. 172.

AUTOMATIC BLOCK.

1. The use of the Main Line (First Sub-Division) from a point 7,500 feet east of the Mandan North Line Junction to a point 1,900 feet west thereof by Westward trains is controlled by automatic block signals. The Mandan North Line (Ninth Sub-Division) for 300 feet from the junction switch is similarly controlled for trains coming off that line. The use of the junction switch, the east switch to Mandan Yard, and the cross-over from yard lead to Main Line used by Mandan South Line trains, controls the automatic block signals in this territory.
2. Switch indicators are located at Mandan North Line junction switch, east switch of Mandan yard, and at the side track end of the cross-over from yard lead to main line used by Mandan South Line trains. These indicators are normally at STOP and equipped with push buttons. Before one of these switches is opened the push button must be used to ascertain whether or not the automatic block district is occupied.
3. Trains coming off Mandan North Line must not pass signal 1993 before pushing button at junction switch and securing a clear indication and then opening switch, which clears signal.
4. Following amendment has been made to Rule 504:
504-c. When a train is stopped by block signal having a square-ended arm, painted red, with round disc below the arm (called home signal) on single track, automatic block signal territory, it may proceed when signal goes to caution or clear position, or if not immediately cleared, by obtaining authority from the Train Dispatcher, or if unable to communicate with Train Dispatcher train may proceed under protection of flag. When train is stopped by signal with a pointed arm, painted yellow, on single track, automatic block signal territory, it may proceed when signal goes to caution or clear position, or if not immediately changed, it may proceed at once under caution.
5. In automatic block signal territory trains using a cross-over will have at least one switch open while occupying any part of the cross-over.
6. A train having pusher without switch crew or a train without pusher must close switch at east end Mandan yard in order to give proper signal indication. Where switch engines act as pushers switch crew will close switch.
7. In reporting automatic signals out of order, Form 1451 instead of message blank should be used. Supplies of these blank forms are carried on hand at Trainmasters' offices, Jamestown and Mandan.

NINTH— Eastward...	Killdeer to Mandan.....	12						Water Grade.						

For each car added to the number specified above, deduct the car factor in tons from rating of engine; for each car less than the number specified above, add the car factor in tons to rating of engine. In figuring tonnage of the car, less than 1000 pounds will not be counted; 1000 pounds or more will be counted one ton.

To secure tonnage rating, a fraction of weight of car more than rating must be counted rather than a fraction less.

Train Dispatcher will determine rate to be handled when reduction is necessary account of weather conditions. When engines are unable to haul the rating, enginemen will designate to conductors the number of tons to be reduced and will wire the Superintendent why reduction is necessary. It must be distinctly understood that the responsibility for reducing train below rating of engine must be assumed by the engineman and not by the conductor.

This rating is made to govern ruling grades only, and will in no manner interfere with handling additional tonnage where the grades will permit.

In making up or filling out trains, the following rules will be followed as far as practicable: Solid trains of loads or solid trains of empties. Where trains consist of both loads and empties, loads in the middle with empties divided between the head and rear ends of trains.

COMMERCIAL SPURS

FIRST SUB-DIVISION.

DISTANCE FROM JAMESTOWN.

- BISMARCK PENITENTIARY SPUR..... 98½ Miles.
- BISMARCK MILITARY SPUR..... 99½ Miles.
- BISMARCK WATER WORKS SPUR..... 102½ Miles.

SECOND SUB-DIVISION.

- SINGLETON..... 4.3 MILES FROM OAKES.

THIRD SUB-DIVISION.

- FARQUAR..... 39 MILES FROM JAMESTOWN.

FIFTH SUB-DIVISION.

- GARLAND..... 4 MILES FROM CARRINGTON.

NINTH SUB-DIVISION.

DISTANCE FROM MANDAN.

- WATER WORKS SPUR..... 3½ Miles.
- ROCK HAVEN SPUR..... 4½ Miles.

NOTE

Surgeons will attend when called upon officially to all cases of accident occurring to employes or passengers. In cases of sickness it is the intention to limit medical service to the locality or town where a surgeon resides, unless some urgent necessity exists, for which distinct official authority must be had in accordance with established regulations. Railway officials are required to call on the nearest authorized surgeons whenever practicable, or when surgical or medical services are needed. When such are accessible, the Association will not be responsible for bills for medical services rendered by any other physician. In the event of a sudden emergency arising from accident, if necessary, proper surgical aid should be procured until the arrival of a regularly appointed surgeon, when the case should be placed in his charge; and in no case should the services of any but an authorized surgeon be continued at the expense of the Railway Company or the Association after such surgeon is able to assume charge of the case. Boarding and nursing are furnished only at our own hospitals. We are not responsible for bills incurred elsewhere, unless specially authorized or approved by the Chief Surgeon, and then only in critical cases of injury or illness occurring in the discharge of duty.
