## SPECIAL INSTRUCTIONS.

FIRST SUBDIVISION  
(MAIN LINE)

1. **Double Track** extends from Billings stock yard to the switch just east of Laurel passenger station. The normal position of the latter switch is for eastward trains.
2. **At Billings** normal position of cross-over switches at stock yards is for passenger main tracks, and will be handled by switch tenders. Westward freight trains approaching stock yard crossovers will call for westward freight main track by four blasts of the whistle, but will stop clear of crossover switches unless they receive proceed signal from switch tender. Westward freight trains approaching 29th street crossovers and destined west of Billings will call for westward main track with four blasts of whistle but will stop clear of 27th street unless they receive a proceed signal from switch tender at 29th street. Westward freight trains destined to Billings will, on approaching 27th street, whistle for yard, with one long and four short blasts of the whistle, but will stop clear of 27th street, unless they receive a proceed signal from switch tender. Eastward freight trains approaching 29th street crossovers will call for eastward freight main track by four short blasts of whistle, but will stop clear of crossovers, unless they receive proceed signal from switch tender. Approaching stock yard crossovers, they will call for switches with four blasts of whistle but will stop clear of crossovers, unless they receive proceed signal from switch tender. Eastward passenger trains will not pass 29th street crossovers until they receive proceed signal from switch tender.
3. **Laurel Interlocking**—Trains will call for route as follows:  
Westward Lead—One long and one short blast of engine whistle.  
Westward Main—One long and two short blasts of engine whistle.  
Eastward Main—One long and three short blasts of engine whistle.  
Eastward Lead—One long and four short blasts of engine whistle.
4. **Speed Restrictions**—At Laurel ten (10) miles per hour over switches from single to double track and fifteen (15) miles per hour over the two crossings west of passenger station.  
At Columbus twenty (20) miles per hour over Pratten Street crossing and crossing just west of station.
5. **Train Inspection**—Eastward freight trains will stop at Springdale and westward freight trains at Columbus for inspection.
6. **Special Stops, Connections, Etc.**  
No. 2 will stop on flag at Springdale for passengers destined Billings and points east where scheduled to stop and to discharge passengers from Butte, Helena and points west.  
No. 3 will stop at Laurel Sundays only to discharge passengers from east of Billings.  
No. 4 will stop on flag at Big Timber and Columbus for passengers destined Duluth, Superior, St. Paul, Minneapolis and east.  
No. 4 will stop on flag at Springdale for passengers destined east of Billings and at Springdale, Big Timber, Reed Point, Columbus, Park City and Laurel to discharge passengers from west of Logan.  
Nos. 207, 208, 209 and 210 will stop on flag at Foster nine miles west of Billings.  
No. 208 will connect at Mossmain with Lake Basin branch train.  
No. 219 will connect at Laurel with No. 210.  
Nos. 219 and 220 will stop on flag at road crossing 1.3 miles east of Onelda.  
Nos. 817 and 18 may carry male passengers.
7. **Register Stations**—  
Billings.  
Laurel Yard for second class and inferior trains.  
Laurel for first class trains only.  
Livingston.
8. **Register Exceptions**—  
At Laurel first class trains will register by card Form 608. Westward first class trains will be furnished train order giving check of register. Eastward second class and inferior trains will be furnished check of register Form 602, by the operator.
9. **Clearance Exceptions**—  
At Laurel first subdivision trains except those originating at Laurel, will not require clearance if train order signal is in clear position.
10. **Bulletin Stations**—  
Billings.  
Laurel Yard.  
Livingston.
11. **Standard Time Clocks**—  
Billings.  
Laurel Yard.  
Livingston.
12. **Watch Inspectors**—  
Alex Califf, Billings.  
A. P. Lytle, Livingston.  
C. L. Calloway, Laurel.
13. **Derail Switches**—  
Billings..... Coal Dock Track.

## 14. Commercial Spurs—

	Miles from Billings	Car Capacity
Siding No. 1.....	4.5	37
Siding No. 2.....	9.5	35

SECOND SUBDIVISION.  
(MAIN LINE)

1. **Double Track** extends from Livingston passenger station to Muir; from West End to switch just west of Bozeman telegraph office. The normal position of switches at Livingston, Muir and Bozeman is for eastward trains. The normal position of switch at West End is for westward trains.
2. **Automatic Switches**—The east switch of westward siding at Muir and the west switch of eastward siding at West End are automatic switches, and can be operated electrically by the operator at Muir and West End, respectively. These switches can also be operated by hand, but when opened by hand must be closed by hand and the handle turned as far as possible to make sure the switch locks. Switch lever is kept in a box, locked with a switch lock, located on signal mast. When switch has been closed behind trains, lever must be returned to proper position in the box in order to clear automatic signals in the rear. The two arm signal at the east end of siding at Muir and the two arm signal at the west end of eastward siding at West End are interlocking home signals. (See page 129, Book of Transportation Rules). These are positive stop signals and when found in stop position can not be passed until automatic switch has been examined by some member of the train crew and found to be in proper position, after which train may proceed to telegraph office under control expecting to find track impassable.
3. **Pusher Districts**—Between Livingston and Bozeman and between Townsend and Helena.
4. **At Bozeman** old coal dock track will be used as westward siding. On track leading from yard to freight house crossing with the C. M. & St. P. Ry. This crossing is protected with gates and when it is in use by the C. M. & St. P. Ry. trains gates will be placed across our track. All engines must approach this crossing expecting to find it occupied.
5. **At Muir and West End** a yard limit sign is located 2500 feet east of the east switch at Muir on the westward track. Also a yard limit sign is located 2300 feet west of the west switch on the eastward track at West End. These signs govern only westward trains at Muir and eastward trains at West End.
6. **At Toston** north siding will be used by westward trains and south siding by eastward trains.
7. **At Manhattan**—Class W-3 and heavier engines must not use wye.
8. **Bridge Restrictions**—  
Engines classes Q-5, W-3 and heavier must not exceed twenty (20) miles per hour over Bridge 184, Sixteen Mile Creek near Lombard.
9. **Speed Restrictions**—At Livingston freight trains from the west eight (8) miles per hour from the crossover near the wye switch until the train has stopped in the yard.  
At Belgrade all trains fifteen (15) miles per hour over Broadway Street crossing just west of depot.  
At Manhattan fifteen (15) miles per hour over Broadway Street crossing just west of depot between the hours of 3:30 p. m. and 5 p. m.  
Between Winston and Townsend eastward freight trains a speed of twenty-five (25) miles per hour and will use time between stations as follows:  
Fifteen (15) minutes, Winston to Clow.  
Fifteen (15) minutes, Clow to Lewark.  
Ten (10) minutes, Lewark to Townsend.  
At Helena twenty (20) miles per hour over main-track switch at east end of Yard.
10. **Train Inspection**—Eastward freight trains will stop at Townsend for inspection.
11. **Staff System**—A train will not leave Muir westward nor West End eastward without the engineman having a staff. Possession of a staff makes the train superior to all other trains between Muir and West End.
12. **Mountain Grade Operation**—Mountain grade Livingston to west switch at Gordon.  
Speed of passenger trains must not exceed any one (1) mile in two (2) minutes and freight trains any one (1) mile in four (4) minutes on descending grade, except passenger trains descending Bozeman mountain eastward may run at a speed not to exceed thirty-five (35) miles per hour to any one (1) mile, divided as follows: Muir to Hoppers use eight (8) minutes, Hoppers to Livingston use thirteen (13) minutes.  
Passenger trains must consume not less than two (2) minutes and thirty (30) seconds and freight trains not less than four (4) minutes in passing through Bozeman tunnel.
13. **Special Stops, Connections, Etc.**  
No. 3 will stop at Belgrade and Manhattan to discharge passengers from east of Billings.  
No. 2 will connect at Logan with No. 222.  
No. 3 will stop on flag at Trident for passengers destined west of Helena or to discharge passengers from Billings and east and south.  
No. 4 will connect at Logan with No. 42.  
No. 4 will stop on flag at Manhattan and Belgrade to receive passengers destined east of Billings and to discharge passengers from west of Logan on Helena line.  
No. 4 will stop at Trident to discharge passengers from Missoula and west and pick up passengers for Billings and east.  
Nos. 219 and 220 will stop on flag at Montellis.  
No. 220 will connect at Logan with No. 236.  
No. 221 will connect at Logan with Nos. 1 and 41.

No. 235 will connect at Logan with No. 219.  
Nos. 221, 235 and 236 will stop on flag at Stanley Spur.

14. **Register Stations**—  
Livingston.  
Bozeman.  
Logan.  
Helena.
15. **Register Exceptions**—At Bozeman train register for first class trains is located at the passenger depot. Train register for other trains is located at the telegraph office. First class trains in addition to registering at the passenger depot will register by card form 608 at the telegraph office.

THIRD SUBDIVISION.  
(MAIN LINE.)

1. **Double Track** extends from M. U. Transfer to a point 1400 feet east of Butte passenger station. The normal position of switches at M. U. Transfer and Butte for westward trains.
2. **At Lime Spur** blasting operations are protected by automatic signals located and operated as follows:  
The eastward advance signal is located 2500 feet west of main track switch Lime Spur.  
The eastward home signal is a board located 500 feet west of main track switch Lime Spur reading, **Stop If Signal Was Yellow**.  
The westward advance signal is located 4000 feet east of main track switch Lime Spur. The westward home signal is a board located 500 feet east of main track switch Lime Spur reading, **Stop If Signal Was Yellow**.  
If a train finds the advance signal in caution position, engineman will immediately bring his train under control and stop before passing home board and not proceed until conductor has ascertained from quarry foreman that track is clear. If a train finds advance signal in stop position they will immediately come to a stop and proceed to signal in opposite direction under flag. After flagging to signal in opposite direction, they may proceed as usual.
3. **Helper District** between Whitehall and Butte.
4. **At Logan**—eastward first class trains must move expecting to find the main track occupied by other trains from the emergency water tank opposite the coal dock to the third Sub-division main-track switch just east of the passenger station.
5. **At Danmor**—Trains stopping to receive or discharge passengers will stop at road crossing about twelve car lengths east of east switch. Ore chutes on spur will not clear engine or box car.
6. **At Butte and M. U. Transfer**—The system of tracks between yard limit sign east of M. U. Transfer Yard and the yard limit sign west of Butte Yard will be considered as one defined yard and operated accordingly.
7. **Speed Restrictions**—At M. U. Transfer fifteen (15) miles per hour over public crossing in middle of Yard.  
Bridge 63 between Highview and Skones twelve (12) miles per hour.

## SPECIAL INSTRUCTIONS—Continued.

8. **Mountain Grade Operation**—Mountain grade two (2) miles east of Pipestone to two (2) miles east of M. U. Transfer.  
When trains by meet order meet at Pipestone, Spire Rock, Welch or Homestake, the westward train will take siding except that eastward light engines will take siding.  
When trains by meet order meet at Highview or Skones, the eastward train will take siding except that westward light engines will take siding.  
Retainers on westward freight trains will be left up until train stops to head in at M. U. Transfer.  
Eastward freight trains will stop at Spire Rock to cool wheels and inspect train. Engines heavier than class Y are not permitted on quarry spur at Welch. This track must not be used above a point two thousand feet from siding. Switching on this track must only be done with engine headed west.  
Transportation Rules 317-A and 376 are modified to the extent that caution cards may be issued to any train in the rear of other trains moving westward between Whitehall and Homestake and eastward between M. U. Transfer and Homestake. Passenger trains must not exceed any one (1) mile in two (2) minutes and freight trains any one (1) mile in four (4) minutes on descending grade.
9. **At Homestake and Highview**—One yard limit sign is located 2500 feet east of east switch at Homestake, and one 2000 feet west of west switch at Highview. Trains will be governed by Transportation Rule 93 between these limits.
10. **Special Stops, Connections, Etc.**  
No. 1 will stop at Whitehall to discharge passengers from east of Billings.  
No. 2 will stop on flag at Sappington for passengers from No. 226 for Logan and east where scheduled to stop.  
No. 219 and No. 220 will stop on flag at Fisherman's Crossing about midway between Cardwell and Whitehall on Sundays and holidays.  
No. 219 will connect at Logan with No. 3.  
No. 42 will stop on flag at Lime Spur on Wednesdays and Saturdays.  
When No. 226 fails to connect with No. 2 at Sappington, conductors will honor via Whitehall transportation from points on Pony and Norris Branch to points east of Sappington.  
Transportation from points east of Sappington for points on the Pony and Norris Branch will be honored via Whitehall.  
In case Nos. 1 and 41 are late and will not make Whitehall by 7.30 A. M., they will stop at Sappington to discharge passengers for the branch.
11. **Register Stations**—  
Logan.  
Butte.  
M. U. Transfer. Register in yard office for helper engines only. Information to be telephoned by engineer to operator at Butte by city telephone.
12. **Clearance Exceptions**—  
Eastward trains must have tunnel clearance before leaving Highview. If clearance is received at Butte it will be furnished by dispatcher. If received at Highview it will be furnished by operator at Homestake.
13. **Bulletin Stations**—

| Colterville Spur..... | 39.5                 | 10           |

ALL SUBDIVISIONS.

1. To insure personal safety operators in double track territory having train orders or messages for passing trains must stand on the right side of the train and never between the tracks.
2. At Lap Sidings—Unless otherwise instructed trains taking siding must head in at the lap.
3. Sidings blocked by occupied outfit cars must not be used for the meeting or passing of trains.
4. Conductors of work trains will issue instructions to their flagman in writing, except when flagman goes back immediately to stop an approaching train.
5. Precaution must be taken in moving trains on double track to prevent accident from swinging doors on cars, lumber protruding from cars or any other loose obstructions attached to cars or locomotives.
6. At Billings, Livingston, Bozeman and Butte when a passenger train is standing at the depot discharging passengers, other passenger trains will be permitted to pull by the standing train by first coming to full stop and then proceeding prepared to stop. See Transportation Rule D153.
7. Except as otherwise provided or when running light without conductor engine-men will only be required to consult register at initial or starting points.
8. Helper engines must not be coupled to train while in motion.
9. When engines are coupling to passenger trains, and in making coupling between cars, engines or cars, must be brought to a full stop not more than thirty nor less than ten feet from the train before coupling is made.
10. When coupling road engine on head end or helper on rear of train, brakeman will immediately give engineman a signal to slack away and see that coupling is made.
11. All cars with weak draft rigging will be placed at rear of train.
12. When conditions will permit, enginemen on freight trains will receive proceed signal from rear of train before passing any station.
13. When a train is advanced by the use of a meeting order put out at meeting point, as per Rule 208-A the train advanced must approach the station named under control and take siding at the first passing siding switch, unless otherwise directed, running through the siding, expecting to find it occupied. The conductor and engineman of the train advanced must bear in mind that the opposing train has no notice of this meeting point until they reach the station and must govern themselves accordingly and must protect as per Rule 99 if necessary to reach the switch used by them in taking siding.
14. An engineman and conductor pilot must be furnished to all foreign trains detoured. The engineman of the foreign train to handle the engine under the supervision of the pilot with reference to speed, observance of signals, train orders and special instructions. The conductor and engineman of the detoured train and both pilots to be furnished copies of all train orders as provided by Transportation Rule 204.
15. When it becomes necessary to utilize a side track for main line, in addition to setting and locking switches for the side track and covering the same by train order, a flagman with proper flagging material will be stationed to fully protect approaching trains in the manner called for in Transportation Rules until movement over main line is resumed. In cases where conductors find it necessary to leave switches set for siding they must fully protect approaching trains until relieved by track men or other employees fully competent and equipped to do so.
16. Trains consisting of loads and empties will be made up with one-third of all empty cars in the train on the head end and ahead of the loads; divided however, so that the empty cars placed on the head end of the train will not exceed the number of loaded cars in the train.
17. Trains moving from siding to main line at lap switches of lap siding stations will be governed by indication of starting signal located at lap switches.
18. Derail switches must be set for derail as normal position.

19. Shipments of stock west bound will be handled on head end of train.
20. **Speed Restrictions**—Passenger trains must not exceed a speed of one (1) minute or sixty (60) seconds per mile.  
Class Q5 and Q6 engines fifty-five (55) miles per hour.  
Speed of double headers on passenger trains on those portions of track covered by slow boards will be ten (10) miles per hour less than limit specified on slow board.  
Trains must reduce speed to fifteen miles per hour passing telegraph offices where orders are received.  
Passenger trains twenty-five (25) miles per hour and freight trains fifteen (15) miles per hour when running against the current of traffic on double track on mountain grade.  
Trains must not exceed thirty (30) miles per hour over interlocked crossings and fifteen (15) miles per hour through crossovers, turnouts and gauntlets.  
Light engines backing up twenty (20) miles per hour.  
W, W1, W2, W3, W4 and W5 engines thirty (30) miles per hour.  
Z, Z2, Z3 and Z4 engines when helping trains twenty-five (25) miles per hour.  
Z engines running light, fifteen (15) miles per hour. Z2, Z3 and Z4 engines running light, twenty (20) miles per hour.  
Trains must not exceed thirty (30) miles per hour on branch lines not otherwise covered by speed restrictions and will make this speed only under favorable conditions.
21. When necessary to take slack of freight trains with helper engine on the rear, it should be done by the helper engine.

The following signs when placed in columns provided indicate:

W—Water.  
C—Fuel.  
O—Track Scales.  
T—Turntable.  
Y—Wye.  
D—Day office only.  
DN—Day and night office.  
P—Telephone.  
X—Yard limits.

NOTE.

Company physicians on their way to visit sick or injured persons will be allowed to ride on freight trains upon presentation of proper transportation.

**Surgeons** will attend when called upon officially to all cases of accident occurring to employes or passengers. In cases of sickness it is the intention to limit medical service to the locality or town where a surgeon resides, unless some urgent necessity exists for which distinct official authority must be had in accordance with established regulations.

**Railroad Officials** are required to call on the nearest authorized surgeon when ever practicable, when surgical or medical services are needed. When such are accessible the association will not be responsible for bills for medical services rendered by any other physician. In the event of a sudden emergency arising from accident, if necessary, proper surgical aid should be secured until the arrival of a regularly appointed surgeon when the case should be placed in his charge and in no case should the services of any other but an authorized company surgeon be continued at the expense of the railroad company or of the association after such surgeon is able to assume charge of the case.

**Boarding and Nursing** are furnished only at our own hospitals. We are not responsible for bills incurred elsewhere unless specially authorized or approved by the chief surgeon and then only in critical cases of injury or illness occurring in the discharge of duty.

NOTE—Length of Load 40 feet.  
Max. width of Load independent of Clearances 11'-6".  
Heights and Widths in Table allow 9 inches Clearance.
