EASTWARD TRAINS ARE SUPERIOR TO TRAINS OF THE SAME CLASS IN OPPOSITE DIRECTION.

DOUBLE TRACK AND AUTOMATIC BLOCK BETWEEN THIRD STREET JCT. AND WHITE BEAR.

Between Claymont and Third Street Junction Mountain Grade Rules will govern Operation of Westward Freight Trains. See Special Instructions page 8.

Enginemen will not be required to consult register, except at initial or starting point.

At White Bear all trains must approach and pull over FOURTH STREET Crossing under control.

At White Bear flying switches over highway crossings are prohibited.

At White Bear, Main Line movements in either direction between White Bear and the new yard must be made with the current

At Gloster cars may be placed on tracks Nos. 1, 2, 3, 4, Scale track and Passing track.

At Gloster, Class "W" power must not be handled on tracks 1, 2, 3 and 4.

Switch targets are numbered and lettered as shown above.

At Third Street Junction, St. Paul, Northern Pacific Engines Class "W" or larger and C. M. and St. P. Engines Class "C" and "L" or larger, are not permitted to use cross overs to and from tracks three (3) and four (4) leading to the White Bear Line.

Between Third Street Junction and Union Depot, double track; trains and engines will be governed by Saint Paul Union Depot Rules and Regulations.

At Third Street Junction, St. Paul, crossing with C. B. & Q. Railway is single track.

St. Paul Yard overhead bridge at Omaha crossing, and tunnel at Seventh Street will not clear a man on side of car.

St. Paul Yard, Minnehaha Street Bridge, opposite Hamm's Brewery, will not clear a man on top of a box car.

East of Seventh Street tunnel, all westward trains must approach cross-over switch under control, expecting to find cross-over in use.

EASTWARD TRAINS ARE SUPERIOR TO TRAINS OF THE SAME CLASS IN OPPOSITE DIRECTION.

Yard Limit Boards-White Bear and Stillwater.

DOUBLE TRACK AND AUTOMATIC BLOCK BETWEEN THIRD STREET JCT. AND WHITE BEAR.

Passengers from Minneapolis desiring to make connection at St. Paul with train No. 68 will be handled on train No. 60. Conductors of all trains using Soo Line tracks between Gloster and Trout Brook Junction will register in train register book at telegraph office Gloster before departure.

Passenger extras and light road engines may run ahead of delayed first-class trains without orders.

Conductors of trains and Enginemen of light engines in and out of Stillwater will make out register ticket Form 608, covering their arrival and departure at Stillwater and will give them to the operator at White Bear.

At Stillwater Passenger Station, close clearance exists at roof of train shed.

Between Summit and Stillwater and other gra les where in the judgment of Enginemen retainers are necessary in accordance with

At White Bear, normal position of double track switch is for westward trains.

EASTWARD TRAINS ARE SUPERIOR TO TRAINS OF THE SAME CLASS IN OPPOSITE DIRECTION. DOUBLE TRACK BETWEEN THIRD STREET, ST. PAUL, AND FIRST STREET NORTH, MINNEAPOLIS.

AUTOMATIC BLOCK FROM SEVENTH ST., ST. PAUL, TO TWELFTH AVE. SE., MINNEAPOLIS.

Enginemen will not be required to consult register except at initial or starting point.

Yard Limits.—First Street North to Twentieth Avenue South.

Between Third Street and Union Depot, trains and engines on double track will be governed by St. Paul Union Depot Rules and Regulations.

At Third Street, St. Paul, crossing with C. B. & Q. Railway is single track.

At Third Street double track switch on East Side line is protected by a derail and Semaphore on Eastward Main track. All trains in either direction will stop at end of double track and proceed only on Switchtender's signal.

At Fourth Street Yard, St. Paul, the supports under Seventh Street Bridge will not clear a man on the side of a car on tracks 6, 8, 9, 10 and 11.

Passenger extras and light road engines may run ahead of delayed first-class trains without orders.

At Mississippi Street tower the Train Order Signal is to govern Soo Line Chicago Division outgoing trains exclusively.

Approaching St. Anthony Park Junction Enginemen will, when necessary, call for route as follows:

Straight Main Line East or West (Line A) — Line A to Line B Westward track — — Line A to Eastward track Line B — — — Line B to Line A via West Wye — — — Line A to Line B via West Wye — — — Line B to Line A Eastward —

In order to prevent cars running out over the derails at the West end of Eustis Street Yard, the hand brakes must in all cases be set with a club on the first six (6) cars from the West end of each track. Yard Foremen will be held responsible for knowing this is done.

At Eustis Street Yard, all trains must call St. Anthony Park Tower on Phone located in old Tower and obtain permission to Cross-over before fouling either the Eastward or Westward Main Line.

At Union all Eastward and Westward trains going to or coming from Great Northern Yard, must call Towerman St. Anthony Park on Phone and obtain permission to Cross-over.

EASTWARD TRAINS ARE SUPERIOR TO TRAINS OF THE SAME CLASS IN OPPOSITE DIRECTION. DOUBLE TRACK BETWEEN THIRD STREET, ST. PAUL, AND FIRST STREET NORTH, MINNEAPOLIS.

AUTOMATIC BLOCK FROM TWELFTH AVENUE SE. MINNEAPOLIS TO WEST END OF ST. PAUL TUNNEL.

YARD LIMITS:

First Street North to Twentieth Avenue South.

Enginemen approaching Mississippi Street on Main line will call for route, or if Dwarf Signal route is desired will call for either as indicated below. The Two arm Semaphore located one hundred feet west of the Interlocking Tower, governs routes as follows: Top arm governs movements on Eastward Main Line to Third Street. The bottom arm governs movements over turn-out to Fourth Street yard, via West Side Line, and movements over Cross-over between the Eastward and Westward tracks of East

Whistle Call

— Freight Tracks to Seventh Street.
— Passenger Tracks to Union Depot.
— Round House.
— Coal Dock.

At Mississippi Street and St. Anthony Park Junction diverging inferior class trains will not be required to procure orders on the time of delayed first-class trains moving in the same direction on double track, but when given the route by towerman will be governed accordingly and may proceed, but if detained and are overtaken by such delayed first-class trains, must let them by

At Park Junction, all Eastward trains filling out or picking up trains at that point, must call Towerman St. Anthony Park on phone and secure line-up of trains on Line A.

SPECIAL INSTRUCTIONS

At Minneapolis, between Plymouth Avenue and Twentieth Avenue North, the clearance along the Omaha delivery track adjoining the Main Line and between the Omaha delivery and receiving tracks is not sufficient to permit men riding on side of cars at all points.

At Minneapolis, the overhead clearance of bridge over tracks at the east end of the "D" yard at 29th and University Avenues, northeast, does not afford sufficient clearance to men riding on top of automobile cars in a standing position.

the clearance along the Omaha delivery track is not sufficient to permit men riding on side west wye at St. Anthony Park Junction. Train movements over this line are subject to all rules governing yard operation. The proper display of markers is required of crews furnished with cabooses while operating over the running tracks on Line "B". When movements are made without cabooses, a member of the crew will be required to ride the rear car. However, it should be understood that responsibility for collision will ordinarily rest with engineman of the approaching train.

SPECIAL INSTRUCTIONS.

SPEED RESTRICTIONS.

Speed of any passenger train handling gas-electric unit being towed in a train must be restricted to forty-five (45) miles per hour.

Class W, W-1, W-2 and W-4 Engines will not exceed forty (40) miles per hour and Class W-3 and W-5 Engines will not exceed thirty-five (35) miles per hour at any time.

Through Cross-overs, turn-outs and gauntlets, fifteen (15) miles per hour. Road Engines backing up will not exceed twenty (20) miles per hour; and Switch Engines moving over main track, running ahead, or backing up will not exceed fifteen (15) miles per hour.

At Stillwater, Eastward trains will reduce speed to fifteen (15) miles per hour between Yard Limit board and Stillwater Station.

Between White Bear and Mahtomedi regular trains backing up will use full schedule time. Irregular trains will use not less than fifteen (15) minutes. Between White Bear and Peninsula Class T Engines must not exceed ten

(10) miles per hour. At White Bear speed of trains between White Bear and Lake Shore stations,

At White Bear speed of trains between White Bear and Lake Shore stations, must not exceed twelve (12) miles per hour.

Between Gloster and Trout Brook Jct., over Soo Line tracks, Class W-3 Engines must not exceed twenty-five (25) miles per hour.

From Claymont Yard to Third Street Junction, westward freight trains must

use fifteen (15) minutes.

At St. Paul speed of passenger trains from East Seventh Street to Third Street Junction must not exceed that shown on time table. At St. Paul through Seventh Street tunnel and between tunnel and Third Street Junction, freight trains must not exceed eight (8) miles per hour. Through interlocking plants speed will be limited to thirty (30) miles per hour. This however does not effect any previous ruling at plants where speed is limited to less than thirty (30) miles.

At Mississippi Street Interlocking Plant, St. Paul. All trains will approach

"Home Signal" under control, prepared to Stop and must not exceed Twelve (12) miles per hour through the Plant.

Passing La Fayette Avenue on west side line leading to and from Seventh Street, speed must not exceed eight (8) miles per hour.

Between Twenty-third (23d) Ave. S. E. and Twentieth (20th) Ave. South

Minneapolis, speed of trains must not exceed Twenty-five (25) miles per hour. On Minneapolis Branch Class T Engines must not exceed twenty (20) miles and Class W fifteen (15) miles per hour at any point.

TRAIN RULES.

When conditions will permit, Enginemen on freight trains will receive proceed signal from rear of train before passing any station.

In case of accident or defective track on the Main Line between switches, when necessary to utilize the side track for main line, the following instructions will govern: In addition to setting and locking switches for the side track and covering the same by train order, to fully protect approaching trains as prescribed by Transportation Rules 99 and 1728, until movement over main line is resumed, conductors finding it necessary to leave switches set for siding, must fully protect approaching trains until relieved by track men, or other employes competent and equipped to do so.

NOTE.

Surgeons will attend, when called upon officially, to all cases of accident occurring to employes or passengers. In cases of sickness it is the intention to limit medical service to the locality or town where a surgeon resides, unless some urgent necessity exists, for which distinct official authority must be had in accordance with established regulations.

Railway Officials are required to call on the nearest authorized surgeons whenever practicable, when surgical or medical services are needed. When such are accessible, the Association will not be responsible for bills for medical services rendered by any other physician. tion will not be responsible for bills for medical services rendered by any other physician. In the event of a sudden emergency, arising from accident, if necessary, proper surgical aid should be procured until the arrival of a regularly appointed surgeon, when the case should be placed in his charge, and in no case should the service of any but an authorized company surgeon be continued at the expense of the Railway Company or of the Association after such surgeon is able to assume charge of the case.

Boarding and Nursing are furnished only at Northern Pacific hospitals. The Northern Pacific Beneficial Association will not be responsible for bills incurred elsewhere unless specially authorized or approved by the Chief Surgeon, and then only in critical cases of injury or illness occurring in the discharge of duty.

MOUNTAIN OPERATION BETWEEN CLAYMONT AND THIRD STREET JUNCTION, ST. PAUL

PER TRANSPORTATION RULE No. 1003 AND AIR BRAKE INSTRUCTION BOOK.

- At Claymont, Westward Freight Trains will stop engine just East of Crossover so opposing trains may use the crossover.
- 2. Rear Brakeman will protect rear of train.
- Engineman will apply brakes making a continuous service reduction of 20 pounds from brake pipe pressure. If application for stop is made from 70 pounds brake pipe pressure he will add sufficient as stop is being completed to make a total reduction of 20 pounds; on completion he will give one blast of the whistle as advice to trainmen that brakes are fully applied.
- Conductor will then start from caboose and head brakeman from engine, inspect all brakes from the ground, noting number of brakes applied and holding, as indicated by cylinder piston rods. Correct piston travel should not be less than six inches and not over nine inches. On meeting the brakeman will advise conductor of number of good brakes in portion of train brakeman inspected, conductor will then determine tons per good brake by dividing total tonnage by number of good brakes in train. It must be understood that no train will be handled down this grade having less than eighty-five (85) per cent operative brakes.
- On conductor and brakeman meeting, signal will be given to engineman to release, he will answer by two blasts of the whistle, place and leave handle of brake valve in release position and as quickly as possible, charge up train line to eighty-five (85) or ninety (90) pounds pressure before starting.

- When brakes are released, conductor will go forward and brakeman continue to rear, each turning up all retaining valves on his portion of train. All must be used.
- 7. Brakeman will return to his regular position and conductor will notify engineman as to the total number of cars and the number of tons per good brake in train, and they will confer and agree as to precautions necessary to control train safely.
- If tonnage per good brake is found by the test to exceed 50, it should be taken as an indication of possible need of hand brake assistance and trainmen must be on the alert to render such aid if its necessity becomes apparent. The engineer will call for hand brake aid whenever there are indications of his losing control of the train. Except in cases of liability of losing control, no hand brakes will be used while descending the grade. Brakemen will ride on top of train from Claymont to
- 9. Engineman will pull out slow enough so conductor can catch caboose after seeing that brakes are released.
- Conductor must observe caboose gauge constantly during the descent of hill and promptly render any assistance which pressure shown thereby may indicate as needed.
- In case of accident, train breaking in two, or pulling out draw bar, hand brakes must be applied on train immediately to prevent train or cars getting away.

Freight trains and transfers will not handle to exceed sixty (60) cars down the grade from Claymont to Third Street Junction.

J. B. McLANE, Assistant Superintendent.

L. J. BENNER, Trainmaster.

TO A PARTY HOUSE BOOK FOR THE PARTY OF THE P

HENRY FLANAGAN, Trainmaster. E. H. BRILEY, Chief Dispatcher.

SPECIAL RULES.

GOVERNING M. & ST. L. TRAINS BETWEEN 1st STREET NORTH AND 20th AVENUE SOUTH, MINNEAPOLIS.

All trains, transfers and light engines will register by ticket at 1st Street North.

Maximum speed limit for passenger trains, 20 miles per hour; for all other trains and light engines, 15 miles per hour.

Between 1st Street North and 6th Avenue South, and between 18th and 20th Avenues South, maximum speed limit for passenger trains, 15 miles per hour; for all other trains and light engines, 10 miles per hour.

All trains and engines must move under control between 1st Street North and 20th Avenue South.

"Under Control" as used herein means being able to stop within the distance track is seen to be clear.

Unless otherwise ordered train orders are not required between 1st Street North and 20th Avenue South. Engines and trains must

Unless otherwise ordered train orders are not required between 1st Serice. Notal and 20th Notal Serices and English and track and move with the current of traffic. Switch engines may use the double track between these points on the time of all except first class trains, under protection, but be prepared to clear main track without delay to regular trains and transfers; and may use the track UNDER PROTECTION, on the time of first class trains after such trains are five minutes late.

Second and inferior class and extra trains and switch engines may run ahead of first class trains which are five minutes or more late,

second and merror class and extra trains and switch engines may run ahead of first class trains which are five minutes or more late, when this can be done without delay to first class trains, and may be run ahead of each other, without orders. All trains, switch engines and light engines occupying main tracks at any point between 1st Street North and 20th Avenue South must be protected, but this rule will in no manner relieve enginemen of responsibility in case of collision, for failure to observe speed restrictions or for failure to move under control at any point, and in case of collision, responsibility will ordinarily rest with the approaching train.

Movements over crossovers must be protected in both directions.

Movements between 1st Street North and First St. South will be governed by automatic block signals; the end of track section protected by automatic block signals is indicated by a sign post reading, "End Block." Lights will govern train movements by day as well as by night; one light only should appear at any one time. A green light indicates track clear, Proceed. A yellow light indicates Caution, that block in advance is occupied, approach next signal at end of block under control. A red light indicates Stop, block not clear,

broken rail, open switch or other obstruction, and train must be brought to a full stop at least 20 feet back of signal and may then proceed under control expecting to find the block obstructed and enginemen will be held responsible in case of accident caused by overtaking a preceding train. When signals are out of order, that is when two lights or more show at the same time, or when a white light is shown, or when no lights show, it will be considered a Stop Signal and trains will proceed accordingly; enginemen will report the signal that is out of order to Superintendent at first available telephone or telegraph office. It must be understood that automatic block signals in the proper proper in the signal of the sig in no way relieve men in charge of trains, switching transfers and light engines, of protecting whenever and wherever required by these

special rules.
Switches at 1st Street North and at 6th Avenue South will be handled by switch tenders. All trains and engines must approach these switches under control, prepared to stop, and must not proceed until it is known that the track is clear, switches are right, and a proceed signal has been received from the switch tender.

Switch connecting lead of wheat yard with the eastward main track between 16th and 18th Avenues South, is connected with a semaphore indicating the position of the switch, and all eastward trains must approach this semaphore prepared to stop.

Engine bell must be kept ringing when engine is moving at all points between 1st Street North and 20th Avenue South-

"Proceed" hand signals given by watchman stationed at either side of Minneapolis Eastern crossovers only govern that particular location and connecting tracks, and must not be construed as indicating that main track beyond is clear. Cars must not be left on main track

without an engine attached unless unavoidable in case of accident, in which event they must be protected by flagmen. Between sunset and sunrise and at other times when day signals cannot be clearly seen, a red light must be displayed on the rear of all transfer trains; when such trains are provided with caboose, proper display of markers is required

These special rules govern main tracks of the Minneapolis & St. Louis Railroad Company between 1st Street North and 20th Avenue South, Minneapolis, and they supersede all other rules and instructions inconsistent therewith.
