Location: LIVINGSTON, MONTANA. (PASSENGER STATION)

Title and Reason: INSTALL BAIKITE RECTIFIERS.

Original Cost Adjustment
Class of Work: No. 13
Made in GENERAL OFFICE 1-19-26

EXPLAN

The dispatcher telephone circuit and the message telephone circuit which extend from Livingston to Billings, are operated from Livingston and use dry battery cells for furnishing current for selector calling operations.

PROPOSED

It is proposed to install 2 complete sets of BAIKITE chemical rectifiers to replace the dry cells for the purpose of furnishing current for selector operations. The installation of this equipment will affect a saving in expense amounting to approximately \$270.00 per annum and will also give more uniform and reliable operation than dry cells do.
