Title and Reason: Estimated cost of Tie Plates placed in connection with Form AA curve relays.

AFE 165-24 provided for tie plates to be used in connection with the curve relays. This improvement was closed out at the end of the year in accordance with the instructions that tie plate AFEs should not be carried over into another fiscal year. The curve relays however had not been completed, and when completed in 1925, tie plates were used and released as shown below. A new AFE will therefore be needed in order that the accounting may be properly handled.
