Title: Proposed Hot Water line to Machine Shop.

Reasons: At the Mississippi Street Machine Shop no provisions are made for the using of hot water for testing boilers in the Machine Shop, making it necessary to turn steam on the boilers to be tested after they have been filled with cold water.

This procedure consumes considerable time and also is a waste of steam.

To correct this condition and provide hot water for boiler testing purposes in the Machine Shop it is proposed to run a two inch pipe line from the boiler washing plant at the Power House to the Machine Shop with risers between the various tracks.

It is estimated a saving of approximately \$150.00 per year will be effected by such an arrangement.

It is recommended the work be done.

Work to be done by company force under charge of

Superintendent.

Accounting to concentrate in the office of

Superintendent.
