The location is on this company's property. To secure rights, it will be necessary

Location: Beach, North Dakota

Title: Power Drilling Machine for Signal Department

Reason:

This machine is to be used in connection with steel relays. Similar machines now in use show that one man with a drilling machine can do the work of four men using hand drills. Considerable saving is also affected in the use of drill bits and the item of overtime closing up at night is also reduced. These savings will pay for the machine in one season's work. Requisition for machine was placed October 20th, 1926 and has been received.

Signed and sealed
President's Office

Work is to be done by company force under charge of Signal Engineer.
