Location: South Tacoma North Machine Shop

Title: Purchase one high speed die head for turret lathes

Reason:

The renewing and repairing of fireboxes on Mikado and Mallet locomotives requires a large number of various sized plugs. We have at South Tacoma one die head for making these plugs, which is inadequate to take care of the requirements. It is recommended that an additional die head with various sized chasers and grinding fixture, as indicated on the attached estimate, be provided. This die head can be used on any of the six Jones and Lamson flat turret lathes in service which will result in increasing production and more promptly returning locomotives to service.

Estimated annual saving in labor \$75.00.
