Joint facility contract reference: Non Joint.

Class of Work: No. 21

The location is on this company's property. To secure rights, it will be necessary

Location: South Tacoma, Wash.

Title: Provide permanent flooring and track foundation in portion of old Coach Shop

Reason: The present floor is laid with plank on sills directly on the ground, and plank is unsuitable for the purpose as it requires frequent repairs, and maintenance cost is high. It is also necessary at times to jack up cars, and this results in badly breaking up the plank walk.

It is therefore recommended that a four inch concrete floor be provided, also a wall for jacking cars. The work of renewing the entire floor in this building is a program extending over a period of three years, the first unit being completed under AFE 958 of 1927.

Engineer's blueprint and estimate attached.
