Location: East Grand Forks, Minnesota.

Title: Repairs to Track Scale. - - -

and

Reason:

The present track scale is not now on pile foundation, has cracked and is settling to such an extent that the scale can no longer be shimmed satisfactorily to keep it in shape for any length of time and it is impossible to keep the scales shimmed and in place without infringing on the limits allowed by the State of Minnesota.

It is proposed placing the scale on pile foundation with a new concrete pit, which includes the reconditioning of the present 125 ton Buffalo Scale. As there are a large number of gravel and other shipments weighed over this scale in the summer and fall should like to secure approval early so material can be secured and work done during the spring or early summer. Weighing on this scale runs 100 to 150 cars per month.

Work to be done by company force under charge of
