BELT:
 N—Renewed
 R—Repaired
 O.K.—Good Order

INSPECTION:
 G—General
 Y—Yard
 P—Passing

Note:—Under head of Inspection and Belts, Inspector will use designated letters as shown hereon to indicate class inspection made and condition of belt.
 Specific gravity of acid to be taken from front right hand cell of each battery box.
 Voltage readings to be taken under full load conditions.
 Height of solution to be shown in inches above top of plates.
 Use separate card for each calendar month. Fill out heading correctly and transfer from month to month, date and place of last general overhauling as shown on old card, which date only changes as overhauling periods succeed one another.
 Mail this card at end of month to Supt. Car Department, St. Paul, Minnesota.

Note: - Show in space above, opposite proper date, all electric work done on, and supplies furnished to the car. One or more lines may be used but care must be exercised to start report on line of actual date work was done. If lights failed, show cause if known. (If more than one line is used on any one date, inspector will bracket same and sign his initials and correct date.)
