MILEAGE OF PROPRIETARY LINES

Spokane, Portland & Seattle Railway Company:

Spokane, Wash., to Portland, Ore.	401.09
Willbridge, Ore., to Seaside, Ore.	114.77
Goldendale Branch—Lyle, Wash., to Goldendale, Wash.	42.22
Fort Stevens Branch—Warrenton, Ore., to Hammond, Ore.	2.81
Vernonia Branch—United Jct., Ore., to Vernonia, Ore.	39.25
Total	600.14

Oregon Trunk Railway:

Wishram, Wash., to Bend, Ore.	152.03
------------------------------------	--------

Oregon Electric Railway Company:

Portland, Ore., to Eugene, Ore.	143.05
Forest Grove Branch—Forest Grove Jct. to Forest Grove, Ore.	10.88
Albany Yard, Ore., to Foster, Ore.	31.85
Sweet Home, Ore., to Dollar, Ore.	0.70
Total	186.48

Walla Walla Valley Railway Company:

Walla Walla to Milton-Freewater	14.28
Maple Street to Baker Langdon	4.60
Total	18.88

Note—The distances given in the foregoing tables are measured from initial or terminal point of track. Distances to and from depots are given in connection with list of stations, pages 3-90. The latter distances are used in time cards.

INSTRUCTIONS TO PERSONNEL IN REGARD TO NEW OPERATING
STATION NUMBERS TO BE USED ON NORPAC AND CAR ACCOUNTING
REPORTS

In this new addition of the Station Number Book to be used on reports to NORPAC and the Car Accounting Office, a new system of five digit operating station numbers for all points on our line has been developed. All operating station numbers have been changed. The sequence of number by main and branch lines and train runs have also been changed in several instances.

Conductors will show the new operating station numbers where cars are picked up or set out including spurs and industrial sidings located outside of yard limits for which operating station numbers have been provided. If no operating station number has been provided, then the number of the closest spur or station should be used. Milepost numbers are not to be shown.

All concerned should study the new assignment of operating numbers carefully so that correct numbers are shown on all NORPAC and Car Accounting reports beginning with the effective date.

There has been no change in the station accounting numbers.

CONNECTIONS WITH OTHER ROADS AND EXPLANATION OF
NUMBERS AND CHARACTERS USED

Opposite junction stations numerals are given, which, by reference to the following table will designate the names of the roads radiating from such stations. The sign (†) shown after the numeral which is used to designate the name of a road indicates that, with the road so designated, connection is made over the track of another road. The sign (‡) indicates that the road has no track connection, direct or indirect, with the Northern Pacific at that point. The sign (Δ) indicates that the road has no arrangements for interchange of traffic with the Northern Pacific at that point.
